This would make an excellent gift for all of the little people on your list -- and Mom and Dad will enjoy it as well. Very unique and well done.

Oh wow, what a totally awesome, inspiring, uplifting book. I just received it today and just had to read it right away. The illustrations are done so that even the youngest child gets the message just from the pictures. I love the poem at the end and the message from Hobo Dan. This is a must read for all children no matter what their age. If we could all remember the word used for each letter of the alphabet, and live our lives by the ABC's, the world would be a far better place. I also love the fact that a portion of the proceeds from the book will be donated to the Children's Cancer Research Fund.

I read Alphabet Living to my children before bed tonight. Not only did they enjoy it, but the looks on their faces meant they were seeing these things too. I think we are going to read this book every night for our bedtime book. The words are written so beautifully that the children are understanding them. It is full of everything I try to teach them. Beauty isnt skin deep. Respect yourself and others. Each page is fully dedicated to bringing out the best in someone if they follow the words. Its very creative, in the fact that its written so children can understand what each letter symbolizes. Truly loved it!

I recently bought this book at a craft show and when I stopped to look at the book, I was amazed at how different it was from most ABC books. It actually teaches a philosophy of how to live and be kind, respectful, etc. also while teaching your child the abc's! I loved it instantly. I bought two copies, then went back the next day and bought two more for gifts. Cudos to the authors and illustrator of this book for all the time and effort they put into this!

Basically a book that is supposed to teach little things by using each letter of the alphabet. Some words just

seemed way to hard for a child age. A parent would have to read this to their child. Pictures were a "meh I can draw this too", meaning that I am a horrible artist and maybe they could have hired better talent. I do give this 2 stars though because it sends a good message and what Hobo Dan and Dr. Bee and whoever else contributed to it worked hard. I appreciate their help for trying to make the world a better place by teaching the young ones early. Live by these alphabets and your life will be well lived. Thanks for the copy from the GoodReads First Reads Giveaway.
