Get rescued by a hero in disguise in New York Times bestselling author Cynthia Eden's Shadow Agents: Guts and Glory miniseries!

The man standing watch over Dr. Tina Jamison was an imposing, scarred figure. Even more frightening was what would happen when her kidnappers discovered they'd taken the wrong woman. Only she didn't realize this same guard was an undercover agent, or that Drew Lancaster left no fellow Elite Operations agent behind.

Running handcuffed together through Texas, Drew vowed to protect Tina against all dangers. For a man who'd fought so many battles, he couldn't afford to lose this one. She'd need to follow his orders to stay alive. But it didn't take a doctor to see that this wounded warrior she'd once feared needed some saving himself....

Good story. The narrator was good, but her male voices not very male!

Susan says

Fantastic book, a real page turner from the start. Tina is a doctor who works for the Elite Operations Division. She is used to patching up agents when they are done with a mission. She doesn't expect to end up in the middle of a mission herself, but that's what happens when she is kidnapped. Only, it's a case of mistaken identity, and if they discover the truth she'll be dead. Drew has been undercover with this group for several months and is shocked to see Tina. He knows he has to get her away, even if it means blowing his cover.

Tina is a doctor. She became a doctor after seeing her parents killed during a bank robbery and not being able to save them. When she's kidnapped by men who think she's her boss's daughter she is terrified. That terror is slightly relieved when she immediately recognizes Drew as one of her captors, as she knows that he will save her. Drew is the one man that has fascinated her since she met him. She is fully aware of what he is capable of doing and of his reputation for having ice in his veins, but that doesn't stop her heart from jumping whenever she sees him. She has complete trust in him and that he will get them out of trouble. That trust grows quickly into love as she gets to know more about him. I loved seeing the way that what he has done in the past doesn't affect the way she feels about him. Being on the run with him also changes the way she feels about herself. She has always considered herself weak, because she can have asthma attacks when under stress. She considers it a huge drawback to her desire to get closer to Drew, because a man like him doesn't need a woman like her. I loved seeing her strength of will develop over the course of the book. I especially enjoyed seeing her stand up to them all and insist on being the bait for a trap to catch the bad guy. And I loved seeing her get to Drew at the end.

Drew had had a rough childhood, doing things he wasn't particularly proud of just to help support his mother and sisters. After joining the army, then the EOD, there were many who thought of him as a killing machine. He is always very coolheaded as he goes about his missions. He had worked hard at his undercover mission to get to the leader of a terrorist group. Finding Tina as the kidnapping victim is going to blow that cover all to pieces, because he can't leave her in danger. He also discovers that his control also disappears around her. His immediate jumping in to protect her from what the terrorists had planned to do to her got them handcuffed together waiting for unpleasant attention. Drew wasn't sure he was going to be able to get them out of it, but he was going to try. He had trouble believing that Tina had so much trust in him. He believed that he wasn't deserving of all that trust, or anything else that she might be feeling for him. That trust in him started working its way past his walls until he was feeling things for her that he'd never felt for another woman, and it really scared him. He had kept his distance from his own family for fear of what he does coming back to hurt them, he could only imagine how much worse it would be if he allowed himself to love Tina. I loved his conversation with Gunner (Sharpshooter) where he asked "Weren't you afraid? That what we do ... Weren't you afraid it would spill over on them?" "I was more afraid," Gunner admitted, "of trying to live my life without her." That went a long way toward making him realize he didn't want to live without her. I loved their ending scene.

The suspense part of the book was outstanding. The EOD people knew who it was that had taken Tina. They had set up a sting to catch the guy, but he took the wrong woman. The action was constant as Drew and his

coworkers try to get away, with the bad guys right on their heels. It becomes obvious that there is a traitor somewhere in the EOD, so they also have to make their plans and try to protect them at the same time. I loved Drew's focus as he tries to protect Tina while fighting his growing feelings. The final showdown was really intense with all the things that were going on. I loved the part that Cooper played, as the author sets things up for the next book.

Personally, I thought that this book had the most twists in the series and also most emotional and suspense which was totally great. It seemed that the villain in this book was really awesome. He was the mastermind of the mastermind that I almost felt that there was no hope for the heroes. I was so glad it didn't end in tragedy. Although I already expected that there could be no way that the author could end it that way but Ms. Cynthia Eden created such a complex and smart evil villain that made the heroes seemed so hopeless. which was totally awesome again btw.

Good guys and bad guys

Tina is a doctor for a agency that does secret operations. When she's mistaken for the boss man's daughter, she is kidnapped. Drew is an operative for EOD and is undercover with the group that kidnapped Tina. He has to get her out and away safely. But when he's cover is blown, they both are on the run but the bad guys know every place they go. When Drew has to choose between the woman he has fallen for or his sisters, can he save them all?

Action, fast paced and sexy. I never knew about this series until an email from Bookbub. I loved it and will have to check out the rest.

UNDERCOVER CAPTOR

This book is part of a series, but I read it as a stand alone. Tina is taken hostage (mistaken for someone else), Drew has to blow his cover in order to save her. They are both strong characters in a suspense filled thriller.

Cindy ~ SnS Reviews says

Never a dull moment in this series. Its high octane from a kidnapping to bombs at Marti Gras. When the heroine Dr. Tina Jamison is mistakenly kidnapped by a terrorist organization thinking she is Mercer's daughter. Mercer is the head of the EOD and has spent years protecting the identity of his real daughter (her story was in the previous book in this series) You're in for a fast paced thrill ride of escapes for Tina and her EOD protector Drew Lancaster trying to stay a step ahead of the man who wants Tina dead. These two had

the hots for each other for years but never did anything about it until they were faced with death numerous times. The villain in this one was someone from Mercer's past who wants revenge. Another great addition to the series and intrigued about the next EOD agents book – Cooper Marshall.

I really like the continuation of the events from previous books in this series. This story is not as exciting and romantic as some of the others, but it was still pretty great. I just wish that there had been more alone time for the couple. I can't get enough of Cynthia Eden's captivating stories!

The fifth book in the Harlequin Intrigue series *Shadow Agents: Guts and Glory* by Cynthia Eden. Dr. Tina Jamison is kidnapped and Drew Lancaster is forced to break cover to protect her. The kidnappers believe the doctor is the daughter of the head of EOD, Elite Operations Division.

Fast-paced and suspenseful romance.

An easy four stars!

Dr. Tina Jamison is kidnapped by terrorist organisation HAVOC in the mistaken belief that she is the daughter of the head of specialist spy/government division EOD. Luckily for her, one of EOD's agents, Drew Lancaster, has infiltrated HAVOC and is ready to put his life on the line to protect her. They go on the run, caught up in a deadly feud between EOD and HAVOC's leaders!

It's an action-packed, suspenseful tale! I must say, the guy on the book cover is quite attractive, so picturing him in action as Drew had me fanning myself a couple of times! The two lead characters are smart and capable, and behave like actual adults. Refreshing!

The plot doesn't hold any real surprises, so some points off for that. Plus, it's part of a series, which means some plot strands are left up in the air. That's always my main gripe with a series. When a line is releasing six books a month like Intrigue does, it's seriously not possible to keep up sometimes! However, this is good enough that I might see if I can get the rest of the series of Kindle, which is a pretty good endorsement from me!

I really like those shadow agents books If this is the definition of ice then I'd love to see more of that. I enjoyed the story and loved the characters. Yet another great book by Cynthia Eden.

Rating 3.5 stars

I like this series, heroine is mistaken as the daughter of the head of EOD and kidnapped and there she finds the hero who is undercover. The hero has always been attracted to her but he thinks he is only best at killing. However, danger changes the equation between them. This book is a typical Eden and a fun read.

Enjoy it..

I really enjoyed the romance between Drew and Tina. They were attracted to each for a long time but gave the impression to the other that there were no feelings. It was nice to see them show their emotions as they stuck together. The ending was nice. There really were times where I wasn't sure how the author could pull off a happy ending, but she did!

Lots of romance cliches, which is very standard for this series.

Over bearing alpha male:

“You’re still afraid of me,” he charged, “but it m done with stepping back. You’re not going to get away from me now.”

H has usually only one need for a women, while the h might as well be a virgin:

“He’d had sex with plenty of other women.”

The two fall in love ridiculously fast:

“She was in love with him. Was it too fast? Too soon?”

I am going to take a break from this series for awhile. The plots/characters/overall feel of each book is TOO similar. I need more variety.
