Friedrich Haas says

The LAM project was especially exciting for me. I even parlayed continued the story line into my miniature website, and sculpted theoretical Jade Falcom LAMs, won by the Wolves in Exile.

Horse vs Colonel Klink.

Brian Turner says

Twilight of the Clans book 4

The action moves back to the Clans, as the Jade Falcons send Horse and a freeborn company to the Smoke Jaguars homeworld where they have a small scientific outpost.

Horse and his command are captured by Smoke Jaguars on landing and he has to play along to their leader (Russou Howell from book 1) to protect his people.

The characters are well done, there's not much mech action going on but the different interactions keep it interesting.

Mark Austin says

I honestly don't remember a ton about these books. At the time (back in Middle School) we were playing Battletech regularly and these stories fleshed out a bit of the world beyond the paper maps and plastic mechs.

A mix of military novel, samurai tale, and twisting political narrative with betrayals and intrigues.

I'll add them to my ever growing "To-reread" list to hopefully give them a more thorough review.
