## From Reader Review Traditional Witchcraft for Fields and Hedgerows for online ebook

### Suzanne Ruthven says

Michael Howard | The Cauldron

The third book in this series approaches the subject from the premise that whether we live in the city or the countryside nature is all around us. According to the author, it is the natural world that can teach us how to be a witch and release the knowledge of the Old Ways ... Overall this series is recommended as a safe introduction for absolute beginners looking for their first connect with a traditional type of witchcraft through the medium of folklore and naturalism.

Deosil Dance Magazine

It is a fascinating and insightful book on the folklore of plants, weather lore, treelore, & nice recipes that are easy to follow. With nice gentle introductions into each of the seasons, it is a good book to give to newcomers & children alike who will be fascinated by the contents.

---

### Nimue Brown says

Taken from <http://www.badwitch.co.uk/2015/03/rev...> this is part of a much longer review of Path to the Mysteries, written by 'bad witch' Lucya Starza.

I've tagged the other books in the series, which Lucya refers to in her review, and also David Salisbury's excellent 'Deep heart of witchcraft'.
