A Moonlit Night: A Woman Scorned Adrianna White

The vampire queen has her army, bred for war and the utter annihilation of their enemies, now she only needs to find the summoner to see her otherworldly goals into fruition. It's proven to be a harder task to accomplish than any of them ever believed, and still the young Emily Johansson flaunts her existence to the rest of the paranormal world. Now, they've banded together, and there isn't a force on this planet that could stop them.

The enemy is at the gates, yet no one back at House Franson has even the faintest clue. After the events of the prior night, who could fault them for trying to recollect some the pieces of their shattered lives before worrying about the next threat that loomed over their heads? Lady Amata, and the horde she's unleashed upon them.
