Ariel Grubb says

I assume that the author of this book isn't a professional. This book is based off an old TV series I've never heard of, so obviously plot and character development wasn't part of the job description. But what were they even thinking?

I know it's just a kid's book, and a lot of people assume that kids don't care about good literature, but it's just as important for children to experience good books as it is for adults to. Sure, all the critics are adults, but the young readers will end up having a grudge against reading if they've never experienced a good book.

The book is about two twin sisters. Their school is cooperating with another school, a rival, to put on a winter festival with several games between the two schools. One sister signs up with several sports because she wants to impress and outdo a boy from the rival school. She is kicked out of all but one of the sports because she was framed of sabotaging the mascot of the rival school. Her sister is left to help her back on the teams.

First of all, it included several cringe-worthy puns. That alone forced me to take away a star. Then, the main character has a crush, and, no joke, he was described like this:

"...Ross Lambert, Ashley's crush. Ashley's heart fluttered at the sight of his totally handsome face."

And the whole book was written like this.

I couldn't get through it.

In conclusion, kids need better books to read. Seriously.

I was a huge fan of Mary-Kate and Ashley Olsen and was on an endeavour to collect all their movies and books.

Two of a Kind was a cute little series that offered interesting storylines.
