**Understanding Humans: An Introduction to Physical Anthropology and Archaeology** Barry Lewis , Robert Jurmain , Lynn Kilgore

UNDERSTANDING HUMANS: INTRODUCTION TO PHYSICAL ANTHROPOLOGY AND ARCHAEOLOGY shows students how anthropologists and archaeologists go about their work as they study human evolution, living nonhuman primates, human adaptation and variation, the origin and dispersal of modern humans, food production, the first civilizations of the Old and New Worlds, and so much more. Using a biocultural approach, the text balances the presentation of physical anthropology with archaeology and concludes with a new chapter that ties together the material on human biological and cultural adaptation by focusing on lessons learned from our species evolution such as the impact of humans on the environment. Students will also benefit from the new chapter opening learning objectives, "At a Glance" sections that summarize key concepts, and end-of-chapter "Critical Thinking Questions" that help students better understand the material and study more effectively for exams.

## Understanding Humans: An Introduction to Physical Anthropology and Archaeology Details

Date : Published April 11th 2012 by Cengage Learning (first published December 10th 2008)

ISBN : 9781111831776

## **From Reader Review Understanding Humans: An Introduction to Physical Anthropology and Archaeology for online ebook**

### **Naailah says**

This was actually a textbook that I didn't mind reading, everything was so fascinating! I'd definitely recommend it to somebody with no background knowledge in the subject, it's very easy to follow along.

---

### **Amanda A. says**

Prof. Mary Silcox's class. Good book, good prof.

---

### **Kate says**

This is the new textbook I am using for this year. It's pretty decent if you are looking for a text that covers both introductory anthropology and archaeology.

---

### **Linh G. Luu says**

Very interesting and valuable knowledge I have discovered about human evolution from this text book. Recommended book for creationists. My own perspective after I read this book is I believe in science, because science is provable, but God is difficult to prove.
