Alienology

Dugald A. Steer

Alienology Dugald A. Steer

Are there extraterrestrials among us? Discover a host of stunning secrets—and an ingenious brain challenge that will light up your world!

The year is 1969, and Professor Alan Grey is ready to lead you on a magical mystery tour of a world where space creatures mingle with earthlings, unbeknownst to all but a chosen few. On the one hand, this dazzling book is a field guide to other worlds, from the solar system to the laws of time and space; from the many species and cultures in faraway galaxies to the primitive state of alienology studies here on Earth. To the sharpest readers, however, this shining resource, with its constellation of brain-teasers, serves as a cunning test: Readers who solve its puzzles are guaranteed to achieve enlightenment—and have a chance to represent humankind in the intergalactic community at large. Here are just some of the topics covered:

*A map of the universe, showing the location of many alien worlds an alien species guide

*Alien biology, methods of communication, and civilizations

*Alien technology and spaceship design

*How to identify aliens who have already infiltrated human society and more!

Alienology Details

Date : Published September 28th 2010 by Candlewick Press

ISBN : 9780763645656

Author : Dugald A. Steer

Format : Hardcover 32 pages

Genre : Fantasy, Childrens, Fiction, Science Fiction

From Reader Review Alienology for online ebook

April Helms says

Another interactive book, this one one of the official "ology" books. This one has a different feel from the others. Here, a scientist, Alan Gray, is investigating aliens on Earth. The reader is invited to become a member of S.P.A.C.E. (the Society for the Promotion of Alien Contact with Earth), in preparation for a sinister alien invasion by a highly destructive species. There also are mind games scattered throughout-tough, too! I am not well versed in alien movies and novels, so I have a feeling a lot of the references and "inside jokes" sailed over my head. Still, it's a nice read, with the descriptions of various aliens and their personalities, as well as information about the galaxy and the solar system.

Drucilla says

This entry into the *Ology* series is incredibly creative. There is so much background presented in the book it's unreal. The frame story pulls the reader into the book in a way that I think kids will really have fun with. A fun read for any extraterrestrial enthusiast.

Becca says

Good book, and very interesting, like all of the Ologies.

Sylvia says

Fun to page through and open all the envelopes and windows.

Rio says

Bingung mau menggambarkan buku ini dengan kata-kata yang seperti apa. Buku yang luar biasa bagus? Tentu saja iya. Ummm, jadi buku ini akan memberikan kita pengetahuan tentang Alien. Di awal buku ini, kita akan dijadikan sebagai Kadet dari S.P.A.C.E. (the Society for the Promotion of Alien Contact with Earth) yang dikomandoi langsung oleh Professor Allen Gray sang Director dari S.P.A.C.E. itu sendiri. Selama menjadi Kadet, kita nanti akan diberi kuliah-kuliah. Mulai dari pengenalan Alienology, kedudukan kita di space (bukan S.P.A.C.E. ya, ingat!!!), diberi kuliah juga tentang bintang dan planet, anatomi Alien, species Alien (baik Humanoid Aliens maupun Technological Aliens), terus kita nanti juga diberi pengetahuan tentang teknologi Alien, cara Alien berkomunikasi, cara mengidentifikasi Alien di bumi, sejarah tentang Alien di bumi. Oh iya semua Alien yang ada di space (tidak semuanya sih) bergabung dalam satu ikatan yakni I.C. (Intergalactic Council) yang dimana mempunyai tujuan untuk mengidentifikasi bahkan memusnahkan S.L.I.M.E. (Surface-Living Intellegent Multiplying Endolith) yakni musuh dari semua species Alien. Nah species Alien yang sudah bergabung dengan I.C. yakni Gray, Taurican, Decapode, Denebian Cyborg, Trader, Proboskian, Marpean, Hyadean, Florean, Cyberbrain, Tirenian, Leviathan, dan Gasbag. Ada hal yang paling mencengangkan. Professor Allen Gray bukanlah manusia, tapi Alpha Gray, salah satu

species Alien yang ada. Tujuan dari Prof Allen Gray yang sebenarnya adalah untuk mencari manusia yang berintelengensi tinggi untuk diundang ke home planetnya yakni Reticulon I untuk bertemu dan bergabung dengan anggota I.C. yang lain. Panjang ya ternyata ??? . Aku suka cara buku ini menyampaikan isi dari buku itu sendiri ke pada para pembacanya. Greatttt. Love u ???

Aimee (Getting Your Read On) says

Have you ever seen kids fight over a book? I mean, fight to actually read it? Like yelling and grabbing and running away to hide with the book kind of fighting? There might have even been some pinching in there too. I have to say I secretly felt a bit giddy over this fighting. Fighting over a book? Really? That's awesome!

Alienology is just fun. There are fun pictures, flaps to lift, stories to read and secrets to be found. You can learn the universal gestures for aliens and be ready to communicate. Well, at least to say hello, thank you and goodbye. You will learn about alien brains and the evolution of eyeballs. There are things to touch, but be careful of the S.L.I.M.E! (Surface-Living Intelligent Multiplying Endolith) It will consume you in order to grow! There are charts to compare different species of aliens, and it tells you which are friendly and which are not. Which is very important. Do you want to know how big aliens are? How long they live? Where they live? What sort of weapons they use? It's all in this book.

The nice people at Candlewick Press sent this book over to review. We loved this book at our house. After the fighting, that is. Each of my kids looked through it and then at the dinner table we all looked through it together. We laughed and talked and had a great time. Those are the moments that make life great, I think. A book that can do that should be labeled "fantabulous"!

Kailey W says

This book is amazing. Most of my friends have read it and loved it. Am I right guys? Yeah i'm right. Anyways this book was the best

Kathy says

Mix of astronomical fact and faux alien non-fiction. Supposedly written in 1969, this purportedly leads a tour where space creatures mingle hidden among earth creatures. Blocks of text are not meant to be read in linear fashion, lots of flaps to turn, textures to feel, several logic tests to figure out, and a mirror to use to puzzle out hidden pictures. Part of a series including "Egyptology", "Dragonology", "Pirateology", "Wizardology", among many others

Ubalstech says

Maybe I am getting tired of these books, but I was more than a little disappointed with this book. I found it to be poorly strung together, with very little cohesive narrative. Other books in the series wove their made up facts and artifacts into a bigger (albeit fictional) story. Usually the original "author" of a manuscript. While the authors have tried to do this by making this the work of a fictional Professor Alan Grey, it didn't really work.

Barbi Faye (The Book Fae) says

Book Review

Caterpickles says

Another entry in the Ologies series, Alienology's reference text format mixes fact with fiction (and a few puzzles) to entice kids into the world of science fiction. The Eight-Year-Old loves these books, but I have sort of the same problem with them that I had with the Dora the Explorer cartoons. Fact and fiction are given equal weight, and that can make it hard to tell where the lines of truth actually are. Parents, you may want to read these books along with your kids.

Daleb. says

Mr. Steer is a very witty, funny, Wild & Crazy guy. I would luv to eventually read All his "Ology" books. Thanks to my library and next youngest bro. i'll be able to read quite a few of them.

Anna says

I didn't expect this addition to the ologies series to be so good, but it was! The aliens included were so imaginative and interesting and they were consistently described. All of the facts about earth, the solar system, stars, planets, and the galaxy were factual but fun to learn. It was a nice touch to add real accounts of

UFO sightings too. The surprise in the back was also really cool - what a nicely put together book on aliens!

Truly says

So you want to contact aliens? Turn to the back cover to find out how...

Saya lsg ingat pada film Man in Black. Eh ternyata film itu juga dibahas dalam buku ini.

Aneka ilustrasi dan peraga membuat mereka yang membaca pasti akan mendapat pengetahuan dan pengalaman yang tak terlupakan.

Tak terbayangkan bagaimana imajinasi saya kalau buku ini saya miliki saat masih kecil. Mungkin akan berpengaruh pada pilihan kuliah dan gaya hidup hi hi hi
