Unbridled Magic Angela Wallace
Book 4 of the Elemental Magic series

Nita Young couldn't be happier: she's getting ready to marry her soul mate, Keenan Donovan, in the company of close friends and family. Everything is perfect...until a major earthquake crashes the party.

As the only elementals in the area, Nita and her friends are sent to investigate a local volcano as the cause. Instead, they find an archaeology team has unearthed an ancient artifact buried deep in the mountain. After Keenan touches the relic and gets jolted with magical energies, he starts developing some unsettling new powers.

Messing with alchemist magic is dangerous, especially when shadow hounds emerge from the volcano seeking the artifact and those who took it. Nita and her friends must battle the dangerous creatures while trying to figure out where the archaeology team stashed the relic. To make matters worse, Keenan's new powers are growing unstable, and Nita has to find a way to reverse the artifact's spell before its consuming magic tears Keenan apart.

Rebecca says

Lightweight and nothing deep here, just an easy read for the airplane.

Alisa Hines says

Elemental Magic's Unbridled Magic is Magical

I'm completely enjoying this series. Each book grows from the next in an ever unfolding saga. I would recommend the series to anyone who loves nature, magical stories, and love.

Fallon Brown says

I loved this book. Loved seeing Keenan and Nita together, even with the problems they went through during the book. And I loved Seamus, and how he handled everything. Especially loved his speech at the end. I'll admit, I almost cried.
