**War Hawk** James Rollins , Grant Blackwood

Former Army Ranger Tucker Wayne and his war dog Kane are thrust into a global conspiracy that threatens to shake the foundations of American democracy in this second exciting Sigma Force spinoff adventure from *New York Times* bestselling authors James Rollins and Grant Blackwood.

Tucker Wayne's past and his present collide when a former army colleague comes to him for help. She's on the run from brutal assassins hunting her and her son. To keep them safe, Tucker must discover who killed a brilliant young idealist—a crime that leads back to the most powerful figures in the U.S. government.

From the haunted ruins of a plantation in the deep South to the beachheads of a savage civil war in Trinidad, Tucker and Kane must discover the truth behind a mystery that leads back to World War II, to a true event that is even now changing the world . . . and will redefine what it means to be human.

With no one to trust, they will be forced to break the law, expose national secrets, and risk everything to stop a madman determined to control the future of modern warfare for his own diabolical ends. But can Tucker and Kane withstand a force so indomitable that it threatens our very future?

## From Reader Review War Hawk for online ebook

### Benjamin Thomas says

The second novel featuring ex-Army Ranger and tracker Tucker Wayne, and his extraordinary military working dog, Kane, was another thrilling adventure with some really cool characters. Set in the world of James Rollins' Sigma Force series, it was nice to see a couple of cameos from characters in those books interacting with the characters of this one and the final chapter indicates their working relationship may become a bit closer in the future.

I enjoyed the premise of this one, that of smart drones with an AI capable of learning on their own, and all of the horrible possibilities that entails if that technology were controlled by the bad guys. I also liked the historical ties back to Alan Turing and the Enigma code resolution, one of my favorite events in history, which served as the forerunner of the AI tech.

I hope this series continues; I'll have them on my TBR list as soon as they come out.

---

### Brandy Wilkes says

What can I say about this book...

heartpounding

humorous, at times

energetic

racing to the finish

James has seriously done it again...and if Kane wasn't the whole purpose of the books, I would really need him to stop putting him in such perilous predicaments cause seriously my heart was about to pop out of my chest!!!!

This is the second installment in the Tucker Wayne series, which is a spinoff of the Sigma Force series. If you love Sigma Force then you'll love this series too.

---

### Orient says

It's the second exciting Tucker and Kane adventure combined by two global conspiracy masters: James Rollins and Grant Blackwood. Tucker, Kane and their friends must solve the mystery that can change the world.

Another fabulous story about Tucker, Kane, their fascinating bond, breaking the law, global conspiracy, the cyber war, secrets, terror, suspense, risk and a madman determined to control the world. Everything I love and expect from James Rollins. James Rollins is the best to offer a fast paced action thriller with historical facts and a shinning star. This book has it all. The action sometimes was so tense that I feared for Kane's life.

Kane <3. The theme of terror and power is well seen in the world nowadays, when greed, money and distrust lurk in it. This book emphasizes it clearly and this makes it up-to-date.

Oh and the cyber theme. I myself am not a tech fan, so some parts of the story made me yawn and roll my eyes. An intelligent-killing-thinking drone. Ok

Like Tucker said:

*I know what you mean. I felt like a dinosaur in there, a dusty relic from another era. All this talk of a new battlefield—an information war fought with digital code and smart drones—I might as well be a knight facing an armored tank.*

Anyway, if you want something gripping to read, this book (and the series too) is worth it.

---

### **Fredrick Danysh says**

Once started on the book I stayed up into the wee hours of the morning to finish. Tucker Wayne is a former Special Forces dog handler with PTSD and traveling the country. A friend locates him and states that she feels that the lives of her and her son are in danger as everyone who worked with her on a secret project is dead or missing. Tucker and his dog are led into a world of corporate terror and artificial intelligence research.

---

### **Magdalena aka A Bookaholic Swede says**

I first read about Tucker Wayne in the short story TRACKER and I instantly liked both Tucker and Kane. WAR HAWK is the second book in the Tucker Wayne series, but I yet to read THE KILL SWITCH, which is the first book in the series. However, it didn't bother me much when I started this book. James Rollins starts off the book in such a way that you quickly get a grip on the characters without feeling lost and I was hooked right from the start with an interesting scene from WW2 that has special meaning to the storyline.

READ THE REST OF THE REVIEW OVER AT FRESH FICTION!

---

### **Skip says**

Tucker Wayne is kind of wandering around (a la Jack Reacher) when a former military girlfriend asks him to check on a former, close colleague, who has disappeared. Turns out, she is one of many missing, working for a shady military firm and Tucker and his military war dog (Kane) are attacked by drones. There is a lot of craziness, as tests are conducted, leading up to full deployment. I miss the longer POV sections belonging to Kane, which were more prevalent in the short story *Tracker* than in Book #1 *The Kill Switch*. Also, there was too much action and too little character development, which is attributable to Wayne being a loner, but unsatisfying to the reader.

---

## Ronie says

I don't know why or what it is, but this series really hasn't pulled it off for me. I enjoyed WAR HAWK (as well as KILL SWITCH), but the stories lagged to me. But I read for the sake of the MWD (who can resist a four-legged hero?!?!), since I have a retired MWD. A good story overall.

---

## Candace says

Army Ranger Tucker Wayne and Kane, military dog companion, are fighting a new warfare -- electronic warfare, psychological operations and cyber attacks controlled by corporations. Drones are robotic soldiers used in modern warfare. Information is the new technological source. News stations and social media are the avenues through which it is dispensed. Can Tucker and Kane stop, or at least slow down, this new modern warfare?

This is my first novel by James Rollins and Grant Blackwood. I found the technology code talk difficult to comprehend. It was above my head. The similes and metaphors helped me to understand it. The description in this book is outstanding. The characters are well drawn and I related emotionally to them. The plot is thrilling and suspenseful. I look forward to reading about Tucker and Kane in the next book.

## Tannaz says

???? ?????! ??? ? ? ? ? ? ? ? ? ? ?

---

## Deborah Wall says

### A man and his dog

This is a fascinating book about the many ways drones and other technology are changing modern war. And through out the story runs the tale of an amazing dog. I was intrigued by the story and almost didn't want. It to end.

---

## RachelW (BamaGal) says

3.5 Stars. There is good and there's bad in *War Hawk*, the second entry in Rollins "Tucker Wayne" series. The good is, of course, more Tucker and Kane. The bad is (for me) that there's too much 'Sigma Force' type action. I had hoped this series would concentrate more on Tucker and Kane. In the first book and the prequel short, they read more like Jack Reacher with a war dog companion; travelling around the world getting in the middle of trouble. This story, however, quickly headed into full on *out-there* Sigma Force. I had hoped for a little more from the new series.

There was a heck of a lot going on here. Basically, it had to do with a rich and powerful man wanting to get

more rich and powerful by setting war drones off on enemies and countries he wanted to destabilize for takeover. Tucker and Kane came into play after an old girlfriend asked him to look into the mysterious deaths of the people who had been working with her on programming the drones. The story does make you think, however, about how powerful drones really are or can be; what they can be programmed to do. Here, the drones could not only spy, they could retrieve information, attack, and learn new strategy while they are in the air to avoid detection and destruction. In short, a form of Artificial Intelligence. Ridiculously outlandish, or something that could really be done? I don't know, but it certainly gave me pause while reading at all the possibilities.

The story went over my head fairly quickly with all the techno-babble. I'm just a lowly high school math teacher. I learned to go with the flow, though, as a lot of it didn't really matter. It was just who they were, and what they were doing to try to stop the drones. That was enough to know. There were Kane scenes in this book, but not nearly as many as in previous stories. By the end, he and Tucker both were afterthoughts in the story. As Tucker himself thought out loud at one point – they were just glorified bodyguards for the geeks doing the real work of getting into the drones programming to try to stop them. He was there for the action scenes.

This is certainly an exciting story, and if you are looking for Sigma Force type action, it's in there. If you are looking for a story truly about the adventures of Tucker and Kane (as I was), not so much. If I wanted to read Sigma Force, I'd pick one of those books up, you know? I was looking for something new and different about the former Army Ranger and his faithful war dog companion; and didn't really get that. Although an enjoyable read, it was just more of the same Sigma Force...

---

### **Reeda Booke says**

Another great thriller from the author of the Sigma Force series, which I love, by the way!

This one is the second book of the new series with Tucker Wayne, an ex-special forces guy and his amazing war dog, Kane. I love these 2 characters and the special relationship that they have, and I am a sucker for dogs.

Tucker is battle scarred and dealing with PTSD from his time in service, especially after the death of Kane's sister. Now, he is caught up in a conspiracy involving a megalomaniac intent on ruling the world, (there's no end to these people), and the next generation type of drones...and these are scary as hell! Throw in some World War II history involving Alan Turing and we've got an action packed, page turning thriller! Loved every minute of the ride and can't wait for the next adventure with this great team. I want that dog!!

\*I received this book for free on Goodreads First Reads Giveaway.

5 thrilling stars and recommended!

### **Sherry Fundin says**

War Hawk by James Rollins & Grant Blackwood deals with a lot of issues that get me so involved in the story, at times I forget it is fiction. This bone chilling, action packed suspense novel had my blood boiling, my head feeling like it would explode and my emotions running AMOK.

Tucker is on the run from his past, she is on the run from the present and Kane is along for the ride. Tucker has an ability to, not only read his dog, but people too. With his skills, knowledge and network of people, he embarks on his journey to help Jane.

I love when there's a critter in the story, and Tucker's faithful companion, Kane, is very special indeed. Their ability to act as one is remarkable and real.

Tucker is a bit damaged from his time in Afghanistan...he suffers from PTSD and he struggles to come to terms with his past.

I agree that pizza and beer is always a motivation to live.

Kane is like the energizer bunny...he takes a lickin' and keeps on tickin'. I could picture him, crawling, belly scraping on the ground, head low, paw by paw...scouting. On the verge of death...more than once...James Rollins and Grant Blackwood kept my heart in my throat, not only for Kane and Tucker, but for the entire team that is willing to sacrifice their life for US.

Karl Webster is a fabulous villain who won't go down.

"Perception is everything."

Warfare is changing and the front line is technological. Electronic warfare, cyber attacks, psychological operations...

The age of technology has reached epic proportions in its ability to shape our future. Too many people believe everything they see on hear on TV, radio, and online, regardless of the misdirection and distraction tactics used by those who wish to hide the truth.

Could this really happen? Has it already? As I read, all my fears are confirmed. I can't help but believe there is no way or will be no way to prevent others from stealing information, affecting our presidential election and possibly causing an economic collapse. If I think about it too long, I am left with a feeling of helplessness, seeing no way to protect ourselves. So we must be vigilant and keep on fighting the good fight, with help from those like Tucker and Kane.

Hand to paw, Tucker and Kane face death with a determination to stop THEM. Makes me so angry, the sacrifices they have made and someone, for their own greedy purposes, wants them dead.

This unputdownable, terrifying, realistic thriller pits the warriors against those who wish to rule, and I will be with them til the end!

I voluntarily reviewed War Hawk by James Rollins and Grant Blackwood.

---

## **Tim says**

An exciting first half is diminished by its lackluster second half through the conclusion. 4 of 10 stars

## **Freda Malone says**

Having been introduced to Tucker and Kane in Bloodline, I was curious about how this new series might pan out with the author's known skill with facts and fiction, as he does in all his novels and series.

I LOVE reading about rescue dogs, police k-9's, service dogs, and dogs with exceptional skills. This novel did not disappoint. However, there was a lot of tech involved. Drones, drones, and more drones. It took me a while to get through the story itself and with each page, I felt like I was studying drones. It felt a bit tiresome to hear about the inner workings of the drones, but like any novel, information is essential to the story, so I didn't give up.

Tucker and Kane are unique, and have a unique relationship. I really enjoyed the characters. Strong, brave, intuitive are some words that come to mind when I picture these two. I haven't read the first in this series, Kill Switch, but will most likely pick it up and enjoy more of these two souls.
