The Soul Healer Melissa Giorgio

It's been two months since Gabi Harkins first learned of demons and the mysterious hunters who battle them. After discovering a few unbelievable surprises about herself, she simply wants to settle into a normal routine that involves dating her boyfriend Rafe Fitzgerald, hanging out with her friends, and eating lots of dessert. But when her peaceful life is destroyed by the ultimate of betrayals, Gabi must rely on her wits—and a few new crazy friends—to survive her hardest challenges yet.

The sequel to *The Sight Seer* combines action, romance, and a healthy dose of humor as Gabi struggles to learn the truth about the secrets that surround her life.

I'm a beta for the Silver Moon Saga, so I got to read this a bit earlier than all of you. The Sight Seer fans are in for a treat!

Melissa ramped up the tension, action and intrigue in this one, in my opinion, and there are still plenty of funny scenes that stick with you. Gabi, Rafe, Evan and everyone else leap off the pages, and it was thrilling to see how each of them respond to the situations at hand.

And there are plenty of new characters you will LOVE to pieces!!

After reading the first one, I thought I had a good idea of where the series might go. Nope! This book totally surprised me, and there were more than a few times when twists and turns made my jaw drop, but they totally worked, way better than what I was guessing would happen.

Begin the count down until April 11th, everyone; you won't want to miss this one! And read The Sight Seer and An Autumn Dream before then if you haven't already!

[It was so hard to right out hate a character here (other than a certain pair), but even after Evan did all that he did, I couldn't hope for anything else than everyone would forgive him.

Then there was Charlie who gave me even more complicated feelings. At one time he's shoving his son away with magic despite knowing

As a disclaimer, I know the author! That said, I loved this book.

I read the first book in this series, The Sight Seer, last year when it came out in June, and loved it. I was equally excited to devour the novella, An Autumn Dream, in November, so I was super excited to read The Soul Healer ASAP. I had to read a portion of it on my phone, so it was a bit more slow-going reading-wise than the other two books, but I still really enjoyed it.

The Soul Healer opens up just before Christmas. There's a lot of new characters introduced, and while I was initially a bit overwhelmed, I grew to like a lot of the new characters quite a bit. Gabi's sass is back in force - she definitely didn't lose her edge. She also mouths off... a lot. It maybe wasn't always the greatest course of action, but she made me smile nonetheless. Very little seems to rattle her, and when something does, she pushes it aside with attitude.

While this book has quite a bit less demon-fighting than the first installment in the series, there is a lot of demon lore and other information about demon hunting that I thought was really interesting - I loved learning how this stuff worked in Giorgio's world. There were plenty of twists I didn't see coming, and I loved that. I would expect the story to go in one direction, and it would do something else entirely.

Another thing I really liked about this book was that it really displayed, to me, how Gabi is just a normal girl thrown into all of this supernatural stuff. She uses sass and snark to deal with whatever gets thrown at her, but I thought it was really evident in this book that despite some of the stuff going on in her life, she's pretty much just a normal girl, and I loved that we got to see her handle various situations with that in mind.

While I was a bit overwhelmed with the new cast members at first, I slowly grew to love the new additions, and in the end my only complaint was that the pace slows down toward the middle of the book, but it picks back up in time, and I found it difficult to put down. Once I was able to read the book on my Kindle again, I finished it quickly. Overall, I thought this was a strong addition to the Silver Moon Saga, and I'm looking forward to continuing on!

After de events of the first book, we know that Evan contacted the Silver Moon and told them about Gabi's healing powers.

The book begins with christmas preparation and gift wrapping while Gabi can't get out of spending a whole week with her father's relatives and can't take Rafe with her neither.

But as always things don't exactly go how they plan and Gabi ends up in Silver Moon's Headquarters, betrayed by Evan.

Even though we don't get much demon action in this book and not much romance given the fact that Gabi was kidnapped and locked in the headquarters away from Rafe, this book still has a lot of action happening and new characters to like and I put off reading this book after reading The Sigh Seer and An Autumn Dream for whatever reason and now I just finished it in a couple hours.

I loved Phil and Kain and they are very funny, and I can't help but love them. I didn't know what to think about Evan. I know his reasons but I was very upset with his decision and even after he realised it, he still wasn't that helpful.

I hated the director of Silver Moon and the two perverts that kept appearing in the book. By the end of the book I wasn't as hateful towards the director. But Silver Moon is messed up real bad.

The whole Soul Healer is another interesting info, what exactly is Gabi and why she has that power if this whole Soul Healer is so rare.

There are a lot of thing to discover about Gabi and her powers, about the things they found out about Rafe's parents, about the whole Silver Moon organization and even the simple things like Evan and his girlfriend and Phil and Kain.

Great book, hard to put down (that's why I only put it after I finished it).

Molly says

Ahhhhh, this was really good and HOW CAN IT END LIKE THAT. Seriously, it was just HERE HAVE A CRAZY END. And I was all WHAT?! NOOOOOOOOOOO.

So, the 2nd book in the Silver Moon Saga, and it was so good! It did lull in the middle a bit for me, but the beginning was REALLY strong and from 80% until the end I was GLUED TO THE PAGES and couldn't stop reading. Gabi was full on sassy-pants mode the ENTIRE book and I loved it. Giorgio's dialogue is always so fun. It's super real and Gabi sounds like a real teen. I loved that. Rafe was also super swoony and the new characters were really fun. Nina drove me nuts, but Philip was really sweet and Kain was... yeah, Kain XD I'm not sure what I think about him. And OMFG I WANT TO THROW MRS. CHEN OFF A ROOFTOP. I'm pretty sure she's even more evil than Voldemort. jfc.

So this book takes place around Christmas and Gabi and Rafe are having a super romantic date and then they get into a fight and I was like NO MY HEART. I can't take them being angry at each other! Then Evan is a total jerk and does something awful and then Gabi is kidnapped and finds herself in the Silver Moon HQ where she meets a bunch of mentally unstable hunters and finds out more about her ability to heal. I really liked A LOT of the part with her on her own. I mean she had her new friends, but Gabi is so strong and I loved seeing her rely on herself. I mean, don't get me wrong, I love her and Rafe (they make such a good team) but I'm glad that Gabi can stand on her own two feet. As I said tho, the middle did lag a bit so I was very glad when they finally decided to GTFO of HQ and the action picked back up again.

I didn't see half of the things coming that happened in the last quarter of the book. And I liked that. Sometimes I thought I had things figured out but nope, they actually didn't pan out the way I expected. Which is good because there were a few things in the first book that I thought were a bit too predictable. And the end, THAT WAS NOT A FAIR WAY TO END IT.

I can't wait for the last book now because I really have no idea what's going to happen now that things took a twist that I didn't see.
