A warrior without a soul...

Raze NaFeen has sacrificed everything in service of his people. Otherwise cursed to die at thirty without a mate, Raze has taken drastic action, destroying his soul and killing his emotions to prolong his life. He feels nothing. No love, no hate, no fear. Until he meets Sierra.

A spy on a mission...

Sierra Alvarez has a lot to live up to. As the daughter of a celebrated general, she's expected to follow in his militaristic footsteps, except Sierra is no soldier. Her talents are best used for sneaking and subterfuge. When an off planet mission gets out of hand, she'll need to use every skill she has and work with a mysterious, sexy warrior who awakens an unquenchable desire within her.

Two worlds collide...

Raze and Sierra shouldn't fit, but every minute spent together sings them with a chemistry too hot to ignore. They'll need to fight pirates, their people, and the vast distances of space to find a way for two lost souls to become one whole. Can a man without a soul find his mate? And is that bond enough to heal wounds that run deep?

Each *Detyen Warriors* novel can be read as a standalone. Enjoy feisty women, alpha aliens, fated mates, and relationships hot enough to steam up your screen.

New strand of Detyen hotties to lust after! After their world was obliterated not every Detyen was happy to sit back and settle on a new planet. Some took up posts on a secret installation were they train to prevent the same enemy they have faced coming back and finishing the job they started.

But these warriors have a mighty expensive way to get out from the ticking time bomb they become when they don't find their mate, they give up their soul. They essentially become android like, whilst still retaining their own bodies. Everything is strategic, emotionless decision based actions. But on mission to recover data from a ship lost during the initial destruction of their planet, Raze and his team-mates come across some pirates and a detachment of human spies!

Sierra was saved from the wastelands by her soldier father and will be forever grateful. But he does not get to look down on her choice of career. She is a damn good recon officer (spy). But on her latest mission she forges an unlikely alliance with a giant green, but undeniably sexy, alien. They have a chance to save some trafficked females and they take it!

But this good turn gets them into hot water of kind or another. Raze also thinks he is about to go over the edge into madness. Well, that or he has met his denya? A human denya?

Great new turn in the story! Loves meeting these new, "Data" like Detyens. Raze was a great lead and Sierra was just the right mix of feisty and vulnerable!

I really enjoyed this novel. The premise of an alien without a soul really intrigued me and I was interested to see how this story would play out. Kate Rudolph built an odd, yet wildly fascinating character in Raze NaFeen. He was very cold...and saw the world only in black and white. If the rule wasn't imprinted in his mind, he didn't express enough emotions to care. Being introduced to him in the beginning was interesting. Mainly because you can't really warm up to him, yet you feel a deep sadness for his situation....being forced to give up in soul in order to live and fight for the Detyen society. It was heartbreaking! As the story progressed, I really enjoyed watching him slowly come back to life. It just made me smile!

Sierra Alvarez was your typical every day human with a cause. She was tough, she was strong, and she wanted to make a difference. She never wanted to hear excuses, she just wanted a resolution. Most times, her resolutions avoided violence...she wanted the solution with where no one got hurt. I love how she accepted her relationship with Raze. She was scared but she knew deep down there was nothing they couldn't face together. And near the end, she had to fight for their relationship which was really great to see. She knew what she wanted, knew what was right...and there was nothing that was going to stop her.

Compared to other sci-fi novels I've read, this seems to have a stronger world building. The insta-romance wasn't always the central focus, which I kind of enjoyed. The people were focused on the rescue mission and that took up a majority of the novel. Watching both main characters change as they worked together (especially Raze) was really fun. I don't really want to say the novel ends on a cliff hanger, but it does leave a few unanswered questions. The romance is concluded...they're out of danger, but what next? I'm assuming that will all be answered in the next novel!

4 1/2 stars, I really enjoyed this book, the premise was great and I loved the characters, the heroine was smart and didn't have tsfl moments and didn't fight the mating. The hero was possessive and I loved seeing him fall in love and react to the impossible. I'm very interested in the books to come and seeing what happens next.

Sierra is a spy her adopted father is general Remington Alvarez

Raze is a green skinned detyen warrior and part of the detyen legion. 2 years ago he gave up all his emotions and soul to live past his 30th birthday because if you haven't found your denya by then you die.

They were on different missions to the same planet for different reasons. Until they touched, kissed then everything changed.

Great action, mystery, drama, intrigue, suspense, betrayal and more. I loved the characters. I couldn't put it down. Great add to the series plot

Voluntarily reviewed a copy and I honestly loved it.

SOULLESS

Soulless is the first book in the Detyen Warriors series. It's a fast-paced read, that's full of action, danger, drama, twist and turns, that keeps you at the edge of your seat. A adventurous read that's both intriguing and captivating. Raze and Sierra are an interesting pair but well suited. They had an undeniable connection and the chemistry between them was energetic and intense. A truly thrilling and entertaining read. A copy was provided to me with no requirements for a review. I voluntarily read and reviewed this book with my honest opinion.

Detyen with hidden depths

Brace yourselves: those heartbreakingly romantic underdog Detyens are fighting back! Not content to search the universe to find their denyas, only to die at thirty if they fail, these smart and sexy aliens have formed a paramilitary band of warriors out to avenge the Detyen diaspora. They've also uncovered a previously hidden (for good reason!) way to extend the lifespan of unmated Detyens. Raze NaFeen is one of those warriors who has elected to sacrifice his heart and soul in order to gain time to find and punish the destroyers of Detya. His mission leads him to the same cess-pool of a moon where human intelligence operative Sierra and her all-female team have come to recon a band of alien slavers who abduct human women for the sex trade. When their missions collide, something unheard of flares between Sierra and Raze, something that jeopardizes both their careers and their lives, something impossible in a human and a soulless Detyen. It can't be the denya bond! Or can it? One good turn, one act of compassion, one courageous decision to trust - and everything

comes apart as quid pro quo leads to fire-fight after spaceship malfunction after betrayal in this action-packed tale of forbidden steamy romance and love-induced miracles. Kate Rudolph has taken her saga of Detyen deliverance up to new levels of angst and excitement, created more characters with depths yet to be plumbed, and added an over-arching plot line that (I hope) signals a new series: Detyen Warriors. Sign me up! I am voluntarily reviewing an ARC, because excellence deserves recognition.

Sierra Is part of a team of three women who were sent to another planet in search of captured human women. They were to find a senator's daughter then report back to earth so that a rescue team could be sent. Raze was also part of a three man team that was sent to the same planet to retrieve information about the destruction of the Detyen home planet. Raze is 32 and is one of one's who gave up his soul before he turned 30 in order to live a little longer. This procedure to take their souls leaves the person like a robit-with no feelings. Things get complicated when he starts getting feelings again when he meets Sierra. The fact that love can overcome extreme situations is awesome. I am excited to read more books in this amazing series! I recommend this book for any sci-fi romance reader

Back From The Brink? of Nowheresville

Raze??? is a Detyen Warrior, who gave up his emotions and soul to live longer and fight for his brothers. Their world? was destroyed, and only the warriors out on spaceships survived. Even that status is precarious, since without a lifemate, they die at 30 years old. The only other alternative is to give up their soul, which makes them emotionless followers of orders, almost robot like, but they go on living. Raze??? and his fellow Detyen warriors are following the trail of the ship that destroyed their planet?. They follow the trail to a pirate planet?. A spy from ?Earth, Sierra???, and her two friends, have also been sent to the same planet?. Raze??? and Sierra's trails cross and they realize they are both after The same thing. They also realize they are forever mates, even though Raze? is never supposed to feel any emotions.

Interesting and well written Adult Sci-fi book?. It does end in sort of a cliffhanger. But there are sequels!

Linda Levine says

I really enjoyed this sci-fi romance. Detyen men and women must find their soul mate or die at a young age. Their planet was destroyed so few have a chance. Now, humans are starting to be identified as mates. Raze meets Sierra and realizes the choice he made may have damned their love. He is willing to do anything for a chance with his mate.

I found the storyline really interesting and liked that author lets both of them get a chance to tell the story. It really helped me connect with the characters. Sierra has a hard job as a spy and faces great danger. Raze has made so many sacrifices. You really want them to get a chance to make it all work.

I am voluntarily reviewing a copy I received.

Wow! It started a little slow for me. Realized Kate was laying the foundation. I was also bothered by all the dialogue in both Raze and Sierra's heads. There was minor action. I really expected more, but was satisfied with the final result. Raze being a soulless bothered me. When he spoke in his head, prior to meeting Sierra, I felt he had feelings and emotions. Simply because he was so sad. I did not understand the soulless issue where he was concerned. It didn't fit.

Sierra, Jo and Mindy are fighters. Loved them. Strong, capable women. This is a cliffy. Be prepared. However, the story keeps me wanting more. I will continue the series. Fun stuff. ?

I received this wonderful audiobook in exchange for an honest review.

Let me by first stating that I have never listened or read anything by Kate Rudolph and Starr Huntress. I am a huge fan of Sci-Fi romance and I figured that I should just go ahead and drive right into these two works. It also helped that Ian Gordon and Jennifer Gill who narrator basically ALL of one of my favorite authors, M.K. Eidem's, books. This audiobook already had twenty million pluses with it.

When I got into the story I realized that it is a good book in its own right as well. I loved Raze and I loved Sierra. The fact that this book had two very strong main characters made me happy. Even though the main characters were great the secondary characters were not. I disliked most of the women in this story. I know as a woman that sounds bad but they just criticized and made Sierra and Raze and all of the Detyen Warriors feel like they were useless.

I understand that some of the women had horrible things happen to them however the way they acted was not needed. Also Sierra's work colleagues were just horrid. I know that they had a mission however it seems as though they dislike Sierra and I want to know why? It just seems as though there is something underlying between the three women.

Even though the description says that this can be read as a standalone do not believe it!! **IT IS NOT A STANDALONE. IT WILL NEVER BE A STANDALONE. PLEASE DO NOT DO IT TO**

YOURSELF IF YOU JUST WANT A ONE BOOK OFF. IT ENDS WITH A CLEAR SETUP FOR A BOOK 2!!!

Very good!

The trope is similar to other SF romances, but novel at the same time!

The idea of people who must renounce their souls in order to survive, though similar to Vulcan culture from Star Trek, is new in the SF Romancelandia.

Sierra, the heroine, is as I like them: intelligent and resourceful, without a TSTL moments, ready to accept the fact that Raze is her mate without too much fuss.

Raze was good too, though I was slightly (very slightly!) irked by his insistence that what is happening to him is impossible! If you fell something, how can you deny the existence of feeling? But, apart from that, he was a good hero material.

The back story was very interesting and I would like to know more, so I'll be reading the next book! :)

Heather Hackett says

Sierra was a spy but her adopted father a General didn't real like it. Her latest mission was to see if she could save some women from slavery. While trying to save the women, she meets a sexy Alien that she's drawn to like no other man. Raze gave up his soul so that he would survive past 30 years of age. Now during a mission to discover how torched his world a hundred years earlier he meets a woman who get under his skin. As they join forces things get more complicated. Great continuation of the Starr Huntress series with twists and turn to keep you glued.

Kim says

After reading previous Detyen books, Souless took me a little bit to warm up to and really get. This is probably one of the stories where I would have been better off not having previous stories of the Detyens. Raze has a lot that he needs to understand when Sierra comes blasting into his path. The story was full of action and both Raze and Sierra had different missions. There were good twists in the story and honest human reactions to events. Once I settled into the story, I was fully immersed.
