An Autobiography, Part 1

Herbert Spencer

An Autobiography, Part 1 Herbert Spencer

"It has seemed to me that a natural history of myself would be a useful accompaniment to the books which it has been the chief occupation of my life to write. In the following chapters I have attempted to give such a natural history." - Herbert Spencer

Avis Black says

People who wander into this book expecting the thick, fuliginous prose characteristic of philosophers will be surprised; Spencer can write quite well when he's aiming for the masses. A very interesting view into the mind of one of the great thinkers. Spencer had his peculiarities; he was a fanatical walker whose feats of mileage are awesome to read about, and he suffered nearly all his life from an undiagnosed thyroid problem.
