My favorite genre of book is spiritual journey. While most of the books I read in this genre are of people finding the Christian faith, I also read a number of books where people leave the Christian faith. I found this book to be highly facinating. I was not familiar with the teachings of the church the author grew up in prior to reading her accounts of her childhood. There was a little repetition with her background, but this was still one of the best edited self-published books I have ever read. I am skeptical of the clairvoyant part, but it was still interesting to me.

If you enjoy spiritual memoirs, be sure and check out this book.

This is a very well written book by a woman who spent all of her childhood and most of her adulthood very indoctrinated in the church. She questions some of the beliefs she has and is shown an entirely different path. This is scary and exciting at the same time.

Great story!

Great read

I couldn't put this book down, found myself reading into the small hours, very insightful about the SDA religion and how hard overcoming those beliefs must have been.

Gritty, honest, courageous. Christian to Clairvoyant tells the story of a women who grew up immersed in the 7th Day Adventist church and how she managed to move away from the confining, repressive doctrines of that belief system and find her own identity as a medium/clairvoyant. This is a story for anyone, I think, who either identifies as a square peg being forced into a round hole or is contemplating change -- go on as before and stay safe or dare to venture out into the unknown.

I enjoyed this book immensely and recommend it to all seekers without reservation.
