## **Pharmacology: A Patient-Centered Nursing Process Approach** Joyce LeFever Kee

Prepare to administer drugs safely by mastering key pharmacology concepts and drug calculation skills!

**Pharmacology: A Patient-Centered Nursing Process Approach, 8th Edition** covers nursing pharmacology within a real-world nursing context. Using a clear, streamlined approach, this text makes it easier to understand pharmacology with a detailed unit on dosage calculations, a nursing process framework for drug therapy, and summaries of prototype drugs. Written by nursing educators Joyce Kee, Evelyn Hayes, and Linda McCuiston, this edition includes a strong QSEN focus, enhanced coverage of prioritization, and more NCLEX? Examination-style questions on the subject of pharmacology.

## **From Reader Review Pharmacology: A Patient-Centered Nursing Process Approach for online ebook**

### **Theresa Ann Casper Nelson says**

I enjoy Pharmacology. I wish it wasn't so basic. I wish it went into more detail about the different names of all of the various medications, how they are dosed and whether or not they're used in pediatrics.

---

### **Seth Bevelle says**

One of my favorite classes. A book I'll hold onto forever. Amazing referral!

---

### **Claire Berslow says**

Eh. This one was okay. It was nice how Kee et al. kept it simple and introduced each category in a separate chapter (so that it's not TOO overwhelming), and then went into the details about "okay; THIS is what a nurse would need to know about this class of drug (which is basically everything about the drug).

---

### **Tonya says**

Drugs are not as interesting as they seem.

---

### **Kimberly says**

This definitely counts as a book read since I read it basically cover to cover. It could have been worse!
