Harley says

I really enjoyed this series.

It's defiantly different from other manga I've read and I really like that about it. It's about friendship, love, and fighting for freedom. The music part really stuck with me, I love musical themed stories, plus That ending to this volume made me so happy, but sad at the same time, It's a good read, the characters are all original. Great book series.

Nic says

I actually did snifle. "Cry" may be slightly strong, but I teared up, and I'm counting it.
