Nice Read

This one was a little slow. But the story was interesting. Had a whole lot of action, plenty of suspense and thrills. But the ending left you hanging.

Sandra Webb says

WOW!!!!

Another excellent installment in the Red Rose Killer thriller. Another exciting love story involving a thrilling mystery. At least all animals were safe in this one not so much the humans.

Geneva Stokes says

Laura Scott keeps the Red Rose Killer story going, great reading.

Good entry in the ongoing search for the Red Rose Killer. Vanessa Gomez is a nurse at the base hospital who has noticed an uptick in overdoses in a PTSD drug. She is also a recipient of Sullivan's red roses which makes her a target.

Isaac Goddard is a pilot suffering from ongoing PTSD as well as guilt over the combat death of his best friend. Bringing his buddy's war dog home and caring for him has been his focus and finally, he hears that the dog will be arriving the next day. He intercepts someone attacking Vanessa after leaving the hospital and becomes interested in her life and family, specifically her brother, also suffering from PTSD.

As their feelings for each other deepen, the threat of danger overtakes both of them. The only positive thing is that an abandoned litter of puppies has been given to them to foster and Vanessa's brother takes to the job like a duck to water. It brings him out of his depression.

The killer is still at large, but there is danger from other areas and they all feel it. The killer also leaves a threatening message for yet another innocent person and the suspense continues.

What a series

The heroine is thought to be assisting the Red Rose Killer in getting in and off the base. The hero is dealing with PTSD and guilt of losing his best friend Jake. If the heroine is assisting the Red Rose Killer than who is trying to kill her. The hero is assigned to protect her. With the heroine's belief in God and her caring spirit the hero is pulled back into the light. This book has attempted murder, drugs, and we find out who the anonymous blogger is. You will never believe it?

this is a page turning story I could not put down till I finished it. Isaac is suffering from ptsd, Vanessa is a nurse in the icu someone is out to get her, Isaac offers to help guard her she is also trying to help her 20 year old brother who is also suffering with ptsd. on a walk they find some puppies and have them check out and get permission for them to foster the puppies, her brother is very good with the puppies. and they help him to copy. who is trying to killer her and is that connected to the puppies and the deaths of several overdose victims? I love the series and the dogs looking forward to the next book. I got my book form Harlequin love them

Puppies!!!! And they are named after national parks — how can a reader resist that? Plus, there are three K-9s in this story as well!!! This might be the first book I've read where the dogs outnumber the humans and I'm loving it!

Okay, the hero and heroine are pretty cool too. We've met them both in previous Military K-9 books and I've actually been really looking forward to Isaac's story. No worries if you haven't read any of the previous books — each one reads well as a stand-alone. Though they share a common suspense thread, each story has a unique mystery to solve too...and a romance to sort out! But I earned bragging rights because I figured out who the anonymous blogger was two books ago and information in Battle Tested proves I was right!!!! Woot! How's that for some keen armchair sleuthing?

Looking forward to the series grand finale next month when the Red Rose Killer will finally face justice!

Elaine Applebury says

Laura Scott, you sure do write good books! I loved the story of Isaac Goddard and Vanessa Gomez, her brother Aiden, and the effect therapy dogs can have for PTSD patients. We must be closing in on the "mysterious blogger" and the "Red Rose Killer!" Hurry next book, hurry!

Caro Carney says
