Hiring the Heavens: A Practical Guide to Developing Working Relationships with the Spirits of Creation Jean Slatter

In *Hiring the Heavens*, Jean Slatter turns abstract expressions, such as "God is within you" and "ask and you shall receive" into something more concrete, more immediate and real. She suggests readers recognize themselves as part of the divine plan of creation and teaches them to simply believe that the "angels for hire" can help them solve problems, both small ("jewel sleuth" to find missing pearls or "spiritual connoisseur" to find a great restaurant) and large ("romance committee" or "spiritual employment counselor"). While written in a light-hearted style, the book is based on the serious concept that everyone is part of "God" and that, like parents, God expects everyone at some point to grow up spiritually and take charge, and that the heavens will support the process if called upon. Using personal stories and real-world examples, Slatter shows how she transformed her life by "hiring the heavens" -- and how the reader can, too.

Marla says

really fun book!

Linda says

Quick read. Recommended to me and I liked it. I thought some of the ideas were interesting b/c it basically says we can have it all...as long as we ask for heavenly assistance and show gratitude.

Donna Brown says

One of the best self help books I've read in a long time. I heard about this book a few years ago but I wasn't ready to try the process. Hiring the Heavens works.

Iona Stewart says

This little book instructs us how to make our lives easier by enlisting the invaluable help of “the spirits of creation”. We learn how to ask these spiritual beings to help us with both small, everyday matters and larger projects – anything and everything.

The book is well-written and inspiring. The author, Jean Slatter, gives us access to “the Universal Yellow Pages”. The hardest thing for me about this method was finding the best, most relevant names for the beings from whom I require help. However, Jean assures us that we don't need to worry about the nomenclature we use: the beings will understand what we mean.

Worksheets are provided at the back of the book on which to fill in the names of the committees and committee members we need.

Jean recounts many amusing stories of how she and her clients received help.

She holds imaginary staff meetings in her car on the way to work, telling them of her intentions for the day. After hiring a spiritual secretary, marketing “rep” and bookkeeper, her practice flourished.

I myself have a spiritual health committee, a spiritual Akashic Records Committee (to help me hear the Akashic beings clearly) when I go into the Records), a spiritual abundance committee and a spiritual bus-catching helper (I don't need a whole committee to help me catch my buses), and am planning to have many other helpers and committees.

So far, I've found out that I must avoid consuming peanut butter (to relieve scleroderma), I have won a small

legacy, and become more inspired to detox my body. Yesterday I got my printer back from being repaired and asked for help to find the apertures in which to insert the various tubes, or whatever they're called (you can tell I'm not particularly technically minded) and printer ink containers. I find that sort of thing extremely challenging. The printer ink just wouldn't fit where it was supposed to – I asked for help, and my fingers suddenly shoved it upwards of their own accord, and it said "click"!

When asking for help, we must do so with intention and trust that the Universe will support us. We should picture the cosmic forces as loving friends who are easy to talk to and understand what we mean.

We should adopt a playful attitude. We are "the very extensions of God Himself, and He gives us unlimited support from the Heavens. We just need to ask.

We should cultivate an attitude of gratitude and ask that the heavenly assistance be brought to us in the perfect way for the highest good of all concerned.

We should have faith, and just know that what we ask for will happen. We can have whatever we ask for. This is the essence of true magic. It is important to define your wants and desires, but also to let go of them – stay unattached! Be patient!

Life will just seem to work out, where previously it was difficult. Things start falling into place, seemingly miraculously.

Jean tells us that the angels want to be included in our life – they want us to call upon them. We repay them for their help by our love and joy.

We are creators with God and the Spirits of Creation, and it is through us God experiences and creates. This makes us extremely important – the Universe is counting on us!

I find this book easy-to-read, enjoyable and inspiring. If you use the principles advised by Jean, your life will be transformed. I have previously asked for and received help from the angels and my household deva, but this book has helped me to take this "work" to the next level. I feel great relief that I can obtain this invaluable help to resolve all the problems in my life, every day, just by asking. Of course, sometimes it takes time for the beings to deliver what we need. The process helps me to learn about TRUST –which is one of the most important qualities we need to acquire. This is an invaluable little book, if you're ready to ask for angelic help!

P.S. Now I've re-read the book and received invaluable help on two occasions.

Sara Crawford says

I have read many "new age" books and books about the Law of Attraction, but this book really puts the idea of getting help from the Universe into a new perspective. It's simple, easy to understand, and it really works for me when I think of "hiring Spiritual guides" to help me with various tasks. I would definitely recommend this book to others!

Hanna says

Very inspirational and creative, expanding on Napoleon Hill's technique, but with its own twists. It adds spice to the process of goal-getting and does generate new ideas to explore. The assumption on which the book is based is also nice to have, that beyond what our senses can capture, there's a whole other world ready to offer support and inspiration from a different perspective (and plane), if only you asked. I enjoyed it very much and will definitely use it in my life.

Elena says

This is an extremely fast read. I am a slow reader and finished it in no more than 90 minutes. But it's incredibly life-affirming. I found myself and a friend in a very tough situation this week, and I was sure that I needed to help my friend without knowing how. Within twelve hours, I heard about this book and I knew I needed to check it out. This book affirms a lot of what I've come to believe since I started to believe in angels (which was its own growth process), but it offers guidelines on how to bring your understanding of angels into a working practice *with* the angels/spirits/Spirit. I can't wait to put these principles into practice, but even knowing that the book came into my life when it did shows me that eventually the processes in it will work for me in some form.

Donna Pachota says

Good book

Quick read helpful . It does give the same message at laws of attraction and many Wayne Dyer books.
Enjoyed

Carmen Beaton says

Amazing!!!

This book is truly amazing! It has helped me enjoy asking for help when I need it. And when I ask, I receive. I am so thankful to the heavens! Who knew??

Mandi says

Beware my dear children of God, this is messing with demons. As in Biblical teaching Satan will come as an angel of light. These are not angels. Find Jesus and cast them out in his name. Do not be fooled. Only God our Lord Savior can give us what we NEED.

Mary says

This book was a very inspirational read that I needed at the current time in my life. When one finds themselves in the mists of a storm in their life we tend to turn toward any kind of spiritual guidance to help

us through the turmoil we are experiencing. I have always believed in Angels and one as always walked with me and guided me. This short read was a nice confirmation that my mind was not imagining things and that these celestial beings are really there helping us if we allow and ask them to.

Love the book.

Diane says

Awesome!

Julie Isaac says

This book was recommended on a Law of Attraction call I listened to on Thursday night. Just from searching inside the book on Amazon I learned enough to begin working with these concepts. On Friday I bought the ebook and am thoroughly enjoying it. What a creative and fun way to enlist the help of Source, our inner guidance, or whatever name you want to give to the Oneness of consciousness that we're all a part of.

Linda Lee says

Good ideas here.

Joel Salomon says

A short practical guide to how you can use angels to manifest your dreams. Learn more about manifesting in Mindful Money Management: Memoirs of a Hedge Fund Manager
