I really liked this book. It was good in a light, non-drama way. It was really hot too. I loved Edward and Bella in this one. I would recommend this book for a quick, light read.

N to the A says

Hunterhunting wrote Edward perfectly. I fell in love with that guy, even though I found it a bit annoying that he was so perfect in looks (insane body, face AND huge dick seems overkill - too easy, you know?). His personality, however, was well-written. His cute, insecure side gave him a depth many authors don't manage to give their characters.

If the author wanted me to fall in love with Edward, she succeeded.

If the author wanted me to fall in love with Bella, she failed miserably.

Bella. Where do I start? I got stuck halfway through this book because a girl can only read the words "beaver/poon/pussy" SO many times without going insane.

In the beginning I was pleasantly surprised. It's rare to stumble across a female MC with such a sexual appetite, and certainly not one where it's described that she masturbates. But then all she seemed to be able to think about was sex. And more sex. And sexy sex. And did I mention sex?

And the THINGS she said and the TIMES she said it! They were so crass and obviously meant to shock and arouse that after a while, it stopped being "cute" babbling and just became attention-whoring. You want me to believe that this girl has a shred of shyness in her? Don't make her rub her ass wantonly against the naked groin of the guy she just had sex with in the locker room, in front of some of his team, her step-brother included.

Every time she opened her mouth in the presence of a man, all this porn-bullshit rolled out and it was so incredibly tiring. Exactly like her mother, to be honest. The fact that a twenty-three years-old woman let her bat-shit crazy and DEEPLY inappropriate mother decide what she's to wear was also ticking me off, not the mention the fact that she constantly complained about her mother and living at home, when she actually had the money to move out.

I was incredibly surprised when I read that she was twenty-three, because Bella Swan read like a really, really horny sixteen years-old. All that derision towards the hockey sluts/hookers/whatever, yet she was the one who couldn't wait to jump Edward's bones, making him, surprise surprise, the less horny of the bunch, which I found ironic.

And I just want to state here that I don't mind her being horny, I think it's great, girl power and all that. But if you're SO horny that 95% of your thoughts seemed to be centered around a guy's dick (and wow did I get tired about hearing how great his dick was), don't look down at the women who aren't ashamed of their sexual appetite.

If the author wanted Bella to be a nerd or book-smart or whatever, she also completely failed to convince me. Bella was just this super-horny, judgmental, attention-seeking little girl with the maturity level of someone a decade younger and the same ability to communicate. Sorry, I know that's harsh, but the more I read and the more I think about it, the less I like this book.

As a last note, I don't know why the author even bothered changing the names to Bella Swan, Edward Cullen so on, since the absolute only thing the characters in this book had in common with the Twilight characters was the names.

The Misapprehension of Bella Swan was a funny, hot, sexy read. A real treasure among the countless stories of Twilight Fanfiction.

Edward is a professional hockey star who is a bit of a playboy in his spare time. His photo frequents the tabloids because of his good looks and his mega hot playboy status. But looks can be deceiving. Could Edward really be more than just a dumb "Hockey Whore"? Can one girl change his image and reputation?

Bella considers herself to be the ultimate nerd who could care less about the sport of hockey. Unfortunately, her family is obsessed with it. Bella's stepbrother is a pro hockey player and her stepdad coaches division A hockey. Bella has high expectations when it comes to her education goals. There is no time for love, no time for hookups, especially with the hot hockey whore Edward Cullen. Or is there?

I this story!!

It was an incredibly cute fic with a ton of laugh out loud moments. The steam level was high. Lots of fanning self moments throughout.

What I really liked about this fic was the character development. Hunterhunting brought Bella and Edward to life. Bella really was the hot unassuming nerd with a ton of oneliners. Edward wasn't your typical hockey player either. He showed off a funny yet endearing side to him. I fell in love.

I'm giving this 4.5 stars for the many laugh out loud moments.

The Misapprehention of Bella Swan is the funniest fanfic ever. Seriously, I could not stop laughing couple of times. And lemons are SOOO juicy... I am a huge fan of ice-hockey and having Edward as a captain and best ice-hockey player in NHL was a real treat for me.

In this story, Emmett is Bella's stepbrother and ice-hockey player. Rene is really crazy and so hilarious here. Edward has a reputation of biggest man-whore and Bella does not want to be just the next of his countless one-night stands. There are some angsty moments but nothing drastic or over-dramatic. I really enjoyed this one and I may even re-read it some day.

Moreover, it is written in 2 person narrative so we get Bella's as well as Edward's point if view (which I like the most).

I had to quit sneaking to read updates of this at work because I would laugh so loud. (I am a banker who sits in the lobby) :) I think hockey players are hot anyway. This is a classic.

La Contessa says

Well I wasn't a hockey fan before but I sure am now! This story was so funny, it's nice to get a mixture of humour and well written smut. Long live the beaver! ;)
