From Reader Review Fly Guy Presents: Sharks for online ebook

Barbara says

Buzz and his pet fly, Fly Guy, demystify the ever-fascinating topic of sharks. Some of the more than 400 types of sharks are introduced, and readers can view great photographs of sharks, their teeth, their denticles, and some of the food they eat. This is a fine introduction to sharks sure to have high reader appeal since there is not a lot of text, and the photos are nifty.

Ashley Simpson says

Sharks discusses all the different things involved in a shark's world. What a shark eats, what it does, all without giving the sharks a bad reputation for being scary. This book shows a lot of up close pictures that kids will love to look at. It really just gives a general rundown of the habitat of a shark and some basic facts about different types.

This was a good book to show the life of a shark without showing the scary side they tend to have at some points.

This would be good to have in a classroom on a bookshelf. I don't know if I would do a lesson over it, but it would be fun to read on the side.

Alyn says

I liked this book better than some other shark books out there. It was simple and contained enough information in it about sharks. It never goes way in depth about any shark but it does give a good intro to sharks in general.

Saffron says

It is very funny at the beginning - well at the beginning it starts of with Flyguy and Buzz and as you get deeper in to the book, it more talks about sharks, and they have real pictures of the aquarium and sharks. They have close up pictures and on some of the pages it is like a journal.

Judy says

Nice easy read about information on sharks very interesting for the younger grade levels that they will be able to read themselves to learn more on sharks!

Peacegal says

Educational easy reader about sharks, with the Fly Guy character to add even more kid appeal. I don't know why every book about sharks has to have that same scary Great White picture on the cover. Sharks do a lot more than just leap out of the water at pieces of steak suspended on cameras.

Eliot Reads says

In this introduction to sharks, Buzz, a boy, and his pet fly, Fly Guy, go to the aquarium to check out sharks. Includes real photos of sharks along with character illustrations and pronunciations along the way. A bit of a longer read, but enjoyable!

Lillyan says

I learned a lot about sharks.

Mary Ann says

Buzz and Fly Guy, two hugely popular characters for beginning readers, visit their local aquarium and learn all about sharks. Kids love the combination of cartoon characters and dialog with clear nonfiction facts and color photographs. When the text explains that sharks don't have any bones, and their cartilage helps them turn quickly, Fly Guy wonders, "NO BONEZ?"--adding just the right humor for young kids.

Mady Dailey says

1. Clark the Shark by Bruce Hale. 2013. HarperCollins Publishers.
 2. I chose Clark the Shark as my twin text because the story portrays Clark as being much larger than the rest of the fish. The nonfiction book also talks about the teeth of a shark and how they quickly rip through and swallow their food. In Clark the Shark, he is also seen devouring food without even chewing. The fiction books brings an actual shark to life and goes through some of it's habits and behaviors.
 3. Description
 4. With these two texts, we would then create a web with different characteristics/behaviors of sharks. The students would use the Clark the Shark story and relate it to the real facts they learned about sharks in coming up with their answers for what sharks look like, how they behave, and other characteristics.

Erin Buhr says

Good combination of story and information. My kids love the FLY GUY books and this is no exception.

Tariah Forbes says

I love Tedd Arnold books White house was so amazing??? love it keep up the good work

Kendra says

If this kind of book were around when I was a kid, I would have read a lot more non-fiction and learned a ton! Really enjoyable read packed with facts.

midnightfaerie says

My children love the fly guy series. We've read a couple now and they never fail to excite my 6 yr old and my twin 3 yr olds. I find him somewhat disgusting, but then again, I have boys, so they are still asking for more fly guy. It's also a nice break because sometimes these are on audio and I get those for them to listen to while I'm making lunch. I still read other books as well to them, but lately, these are their favorites. Also, some of them are now topic based and very educational which is an added plus in my book. Arnold is quickly becoming a well-known name in our household.

Alexandra Topitzes says

Reading Level: 2.8

Book Level/ Guided Reading Level: L

Fly Guy Presents: Sharks is an Informational Text book for children that follows a young boy named Buzz (who "hosts" quite a few other informational texts on an assortment of topics) and his pet fly, Fly Guy, on their explanation of the aquarium, providing simplistic yet interesting facts and high-quality photographs on a wide variety of shark breeds.

This book would understandably be an ideal read aloud for any level of elementary grade during a science unit on ocean life. It could also be a meaningful addition to a text set made available to students during an inquiry based science unit on ocean life. On an individual basis, this would be a great book for a teacher to recommend to a student who shows a high amount of interest in sharks for independent reading. Additionally, this text would also be a good mentor text to demonstrate the writing traits of conventions, organization, ideas and presentation, for students during writing workshop mini lessons. I particularly like how the author provides phonetic pronunciations right within the text of the more difficult content-specific vocabulary.
