## **Basis Of Singaporean Spirit - People Power: Why Do You Want to Go to Heaven? Boss**

When we were young, we were told to be good and kind, so that we can go to Heaven. Have you ever wondered: Why do you want to go to Heaven?

This book brings you through a thought-provoking journey and provides a fresh perspective by looking at things through the "Basis" perspective. When you start to look at things from the basis perspective, things become simpler and clearer.

Other questions that are discussed include: What do you want to achieve in life? Why the poor hates the rich? Are you a xenophobe? How philanthropic are you? How smart should a leader be? Are you superstitious?

The book approaches the questions using Chinese Wisdom and highlights why the number "3" is so magical and how it relates to the Heaven, Earth and People elements - Commonly known as the Three-Powers. Examples are cited throughout the book on the usage and the application of it, including the Chinese Art of War. This book also touches upon the unhappiness in Singapore and provides an analysis and explanation to the issues using the basis perspective. This is an abridge version of an earlier book for the general and spiritual audience.

## From Reader Review Basis Of Singaporean Spirit - People Power: Why Do You Want to Go to Heaven? for online ebook

### Basis Of says

A very thought-provoking book. Instead of the usual way of defining leadership, the author goes all the way down to define the basis of it. As the author stated: *"The basis is of utmost importance, when the basis is wrong, nothing will be right."*

In order to prove the importance of "basis", in the first chapter, the author leveraged his professional experiences to walk through with the readers on a case study in great details and explained why you could still fail terribly even if you had *paid top dollars to employ the so-called 'best and most qualified' people, leveraged the best methodologies, performed the most complex analysis and modelling.*

And the reason for this failure is simple - *"when the basis is wrong, nothing will be right."* The case study that was presented perfectly illustrated this point.

For those interested in understanding Chinese Wisdom, this is a good introductory book. One of the key concepts discussed is the 3 Powers: Right Time - Heaven Power, Right Location - Earth Power, and Right People - People Power, which the author demonstrated its application throughout the book. The author then followed with the explanation of Steve Jobs' phenomenal success using the 3-Powers and guided the readers to Jobs' People Power - the often overlooked but very important aspect in the 3-Powers concept.

If you are tired of constantly reading books that analyse the success of people and organisations (after they had achieved it) and summarising it as 'the model that they took', you should take a look at this book, which investigates it from the "basis" perspective.

The author also drew reference to Steve Ballmer, and highlighted his failure as CEO of Microsoft simply because of not understanding the basis of Microsoft.

Other bases that were touched upon include: Basis of a Political Leader, Basis Of Organisation, Basis of Wisdom, Basis of Philanthropy, Basis of Harmony, Basis of Government, etc.

And of course, not forgetting the most interesting basis of all, especially to all Singaporeans - *The basis of Mr Lee Kuan Yew's contribution.* In the book, the author guided the readers down to the definition of this basis. The author claimed that this basis that Mr Lee Kuan Yew did is something that even Sir Stamford Raffles could never achieved. Once you know this *"basis of Mr Lee Kuan Yew's contribution"*, well, there is no way for you to rebut this statement.

The author then moved on to highlight that this is the very basis that every Singaporean must seek to protect in order for Mr Lee Kuan Yew's contribution to be remembered in history, else, as the author summarised: *"... the whole lifetime that Mr Lee Kuan Yew had devoted for Singapore will all be wasted - Whether there had been a Mr Lee Kuan Yew or not, will be of no consequence to Singapore."*

The book is based upon the unhappiness in Singapore; however the analysis and knowledge are equally applicable on the global stage. Other unconventional thinking includes questions such as: *"What Do You Want to Achieve in Life?"*, *"Why Do You Want to Go to Heaven?"* and others. The conclusions made in the book will blow your mind off. If you belong to the rich and powerful, the chapter *"Why the Poor Hates the Rich?"* is for you. After reading that chapter, it will change your future thoughts and behaviours.

This is a must-read for those intending to look at things from a fresh new perspective.
