One of my elderly woman brought this book from the library, gave it to me, and told me to read it out loud to her.. next thing you know, over the time frame of 3 days, I have a group of people around me listening and we had very good conversation about this today. Yes.. it was a little heated at times because you have so many people and so many opinions, but all in all this was a great book. They really enjoyed it and so did I.. if not for what the book was about, then atleast for the fact that it gave elderly people whom are closer to death and what possibly comes after it than a lot of us reading this, a chance to really think and use their brains for more than BINGO.

They talked about their own experiences, the things they have seen and/or felt when someone has passed in the room.. the things they have heard others say in the hours leading up to their deaths.. This book had everyone thinking and I honestly believe that is what it was put in my hands to do.

I like Sylvia's style of writing. She is witty and interjects with many amusing things. Sometimes I find myself laughing out loud.

I am currently reading this book and find it fascinating. For me it's an exploration which I remember to take with a grain-of-salt but I can't help but think it all make sense. And thoughts that I had before... are coalescing together. I would recommend this to anyone who wants to study spirituality and work on it. This book was witty, quick, and smart. It really urges one to trust in their higher power and offers so much insight!

MizzSandie says

This woman is apparently surrounded by controversy and a lot of people say she is a fraud, and of course she herself claims to be a true psychic. I don't know what to believe, to be honest, but the truth is i'm enjoying this book regardless. What's important to me isn't so much wether she really did and have seen all the things she says she did, or if they come true, I still find it an interesting read, and i like the overall messages in the book.

I definately think it's good to be skeptic about these kind of things and not to take anyone elses claims for granted, whatever they say and whoever they are. Don't let yourself be led blindly by anyone. Think, feel and live for yourself and stay true to your own convictions.

It just so happens that I believe a lot of the same things as Sylvia believes, and her being a fraud or a 'true' psychic doesn't make what i believe any more or less true.

Not everyone believes that Sylvia browne is a true Physic, me.. i dont know what i believe but i do know this Parts of this book rang true to me as it supported a few experiences that i have had, If your not a fan of Sylvia browne thats ok you dont have to be this is not a book of perdictions or anything truely Physic its is

more or less a book about the other side told by those who believe they have seen it themselves

Ashlie Gillis-Nelson says

This book literally change my life and my faith. I was 21 when I first read this book on a whim. I was browsing the book isle while waiting on pictures to be developed at wallgreens when I saw this book and had remembered hearing about Sylvia Browne on TV and thought I would check it out.

I have change my belief systems many times over. I have been Baptist, Non-denominational, Wiccan, Buddhist and a few others. I have always been fascinated with death and life after death and searching for the one religion and faith that had all the answers. I don't think we are meant to know all the answers, but Sylvia Browne seems to have more than most others. Sylvia even admits that she is not always 100% right. No psychic ever is. So it makes me sad when people give her such a hard time when she has been wrong in the past. She stats in more than one of her books that her accuracy is not always right, but most of the time she is.

The best thing about this book is you don't have to be religious to enjoy and find comfort in it. After reading the first few chapters I was hooked! I have been following her and her spiritual teachings now for 13 years and am a member of Novus Spiritus. I have attended two of Sylvia Browne's seminars live twice while I lived in AZ. I own almost all of her books and have been involved in her study groups. I am currently working towards becoming a ordained minister through her church.

This book is amazing and it will bring you the peace you need in your life.

Marla says

I really need to read a few more of her books. This one fascinated me! I think my (by far) favorite part was when she explains how our children choose us. I was so overwhelmed with this idea that I immediately went to my son and put my arms around him in a hug and told him "Thank you for choosing me as your mother."

Deanna says

This book has helped me so much. When I read any of her books she makes me feel so positive about life. I've learned to worry less and look at death as another adventure and not the end.

Karen Newsham-Goulding says

I am writing this review now 11 years later and to this day I live my life based on the beliefs Sylvia Browne has laid out in this book.

I read this book back in 2001 just after the loss of our daughter Victoria. It helped me a lot to understand the other side (Heaven) and why everything happens for a reason and how we choose our life before we come to this life or the body.

I will add to this review again after I read the book again.

I highly recommend this book to anyone that has lost a loved one. If you can believe in Sylvia it may heal your wounded heart as it did with mine.

As with any spiritual book, you take from it what you desire to know. I met Sylvia Brown before she became famous when I was 19 years old. I can attest to her amazing gifts. That being said, nothing is constant and predictions should be taken with a grain of salt. You are the creator of your path in life. If you are curious to matters beyond the physical existence, this is a great insight to those possibilities.

Maizie says

With her super natural abilities she tells what happens when you die. You might not believe but she makes a skeptic change their mind. Her books are very informing and leaves you only wanting more. If you're not sure pick up the book read a few pages and you just might change your view. She is a very intelligent woman who has knowledge to share even if you don't believe in what she does it doesn't hurt to expand your knowledge.

Jamila says

I thought The Church of Scientology was ridiculous until I read this book. I have a very open mind and was looking into a lot of spiritual based books to give me insight after the death of a good friend which I did not find through the pages of this book.

Brown's "ideas" are so out there, they are ridiculous and demented! It is no surprise she appears on daytime talk shows. This book is meant for people who enjoy Jerry Springer and other trashy TV programs.

Brown tells us that "the other side" is a dimension exactly three feet off the ground where we live with dinosaurs and mystic creatures, all spirits are 30 years old and can change gender/race/clothes with the blink of an eye. Time on the "other side" is spent living in a variety of homes, cruising around in hover carts, going to cocktail parties, concerts, art exhibits and lectures, all the while trying to decide if and when they should "re-visit" Earth for another incarnation.

Although I found this book in the New Age section Brown is trying to market the book as non-fiction when it is nothing but a fairytale. After reading a few chapters I tossed the book in shame because I would be humiliated if anyone saw this trash on my bookshelf.

Maria Carmo says

Even if I have some different perspectives regarding some of the subjects, it is a good book in as much it encourages people to be positive, have the courage to search for their own truth and not to put themselves under any external influence that may take away their dignity and well being. It is certainly written by someone who is filled with good "vibes" and I enjoyed reading it.

This is my second book I've read by Sylvia Browne. The first one I read was solely about reincarnation and near-death. That was really good and it reaffirmed my belief in reincarnation and spirit guides, so I've always been interested in Sylvia Browne's work since that book. Reece found this for me recently and I'm glad she did.

In this book she does talk a bit about spirit guides and reincarnation, but she mainly focuses on the "Other side" which is a form of heaven, but not your a-typical heaven with clouds and harps. Bleurgh. Who wants that? BORING. She talks about how the Other Side is much more in-tune in your interests and so forth. It is also on Earth, but its considered a different dimension. Better then the old tales of heaven and I can get behind something that doesn't involve me being naked on a cloud playing a harp. *nods*

She also does talk about talking the dead, ghosts, angels, and even the future. I've had my far share of ghostie encounters, but as for the future? I can't take her serious. No one can predict the future in my mind. Maybe you can predict a general thing that is set in stone, but I don't know if if "God" or whoever would curse anyone with that knowledge. Plus....it's like reading the end of a book. Leave well enough alone.

Now I have of course had my future told to me from many different psychics. They've been 20% right. I also do divination cards and tarot cards to give me direction or help or whatever (they've been more right then psychics), so I believe in those more so. However, the future is too fickle in my mind.

Now...reading the past is more set in stone. I totally believe in reincarnation and all that stuff, because I've experienced a couple of my past lives through regression. Its spooky and explains a lot about why I am the way I am. It also explains why I am here and trying to "better myself". I won't go into details about my stories, because I am shy and I don't really want people too know that. I rarely have told any friends or my parents (I oddly feel embarrassed and I don't want people to look at me like I am crazy - I know, I know.....I should not be ashamed in my beliefs).

This was a quick read and it was interesting. Do I believe in everything Sylvia Browne says? Hell no. Do I believe in some of it? Yes, but I've experienced some it and I'm a "have to see it to believe it" type of gal. THUS why I don't believe in aliens completely, because I have not had an experience with an alien or UFO or whatever.

I do recommend this to those with an open-mind. It's an interesting belief on the world. Is it any more crazy then any other religious theories? Nope. Some of it makes sense, some of it seems out of this world. Out of five stars, I stamp this with 4 stars. More like 3.5 stars, but I rounded.

A Haunted Reader says

After going through a crisis of faith, I was sure that psychics could help restore my faith in the divine. After buying several of her books and reading them I was completely convinced that she would make a wonderful fiction writer. She has no talents. After reading her biography and reviews of her 'psychic' sessions I realized she was a complete fraud. Her ideas are absolutely looney. If she believes half of what she writes she's a nut.

Abby says

Great intro and reference book to The Other Side. Covers the basics of metaphysical/spiritual concepts. Sort of reminded me of the 'Handbook for the Recently Deceased' in Beetlejuice. Looking forward to reading 'Life on the Other Side.'
