Bound by Duty Jana Downs

[Everlasting Classic ManLove: Erotic Alternative Sci-Fi Consensual BDSM Romance, M/M, public exhibition, spanking, sex toys, HEA]

Jess Taylor has been selected. Chosen by the annual lottery as a sacrifice to the aliens that saved mankind from the Great Plague, he could care less what happens to him. Little does he know that his first alien master doesn't provide much and has a gambling problem to boot. When the debt gets too high, he's sold to another who might provide all he needs and so much more.

Noss, the first spawn of Prince Kranok, is duty bound to take care of his family. Unfortunately for him, no one wants to marry him because of his father's scandal. Noss doesn't expect much when he buys the human but he gets more than a handful.

Passion spirals quickly into something more meaningful and they'll have to decide if being bound by duty can make them happy in a world where changing the rules might mean the destruction of the house that Noss is trying so hard to keep together.

Really good but I wish the sex scenes were a little more explicit and maybe a couple more would have been good. But it was better than I expected....BTW ..I wouldn't mind meeting a guy with 2 dicks.. even if they are Blue Lol.

Bound by Defiance is recommended to read before this.

Finally we get a taste of the 'other' side! The human equation is the dominant force. I did think that Jess came across as a bit TOO much as roll with the flow of things but I definitely enjoyed this more than Alexis' story. The family dynamic is quite complex on the surface of Eolean society but once their walls come down we get to see how it is 'supposed' to work.

Great addition to the series

Review written for MM Good Book Reviews

This story is part of a series and can be read as a standalone but is best read in order. Jess has been chosen by the alien lottery and he thinks that it won't be all bad, after all anything would be better than the complete indifference of his parents. Things aren't too bad but then his owner's gambling debts get too high and Jess is sold off, and he discovers being picked by the alien lottery is the best thing that has ever happened to him. Noss was forced to take on the role of Arak when his father Prince Kranok was arrested, it is a role he dreads but to keep his family together he will put his own happiness aside. Noss has to buy a human when the scandal keeps away marriage prospects and he gets much more than he bargained for in Jess, their passion is explosive and they both find what they are looking for in the other but Noss has to decide whether he can accept what is being offered or if he will be bound by duty.

This is a great addition to this wonderful sci-fi series *Owned*. We briefly met Noss in *Bound By Defiance* as he took over responsibility for his family. Noss never wanted a traditional household but with his father gone he has to take over his role to keep his family together, but he can't become Arak unless he gets a concubine and nobody wants him now buying a human is his only hope. When he gets Jess he has his hands full with the horny human but the bliss he finds in Jess' arms might not be enough. Jess finds something he has never had when he is sold to Noss, he finds a family that accepts him but getting Noss to see that he can have a happy life and keep his family together is harder than he thinks.

I loved this story, both characters are wonderful and they are perfect in this story together. Jess has had a crappy life being ignored by his parents, he will take anything that life throws at him with a smile so when he is chosen for the lottery he figures it won't be so bad. When Jess is sold onto Noss he accepts that he is a convenience but still manages to find his place in the family. Noss feels he has no choice but to become Arak but finds himself longing to submit to Jess, he also doesn't know if he can hold out hope for what Jess offers him.

This is a great story that brings two men together who both have something that the other one needs, Noss needs Jess to show him how to let go and accept change and Jess needs Noss to show him how a family really are and the love and comfort they bring. Jess is a character that you can't help but feel compassion for, he has been treated badly by his parents and has to find the love of a family in an alien family. Noss is trying to protect his family and you can't help but love him, but he also fears changing their family standing.

I recommend this to those who love science fiction, human and alien smoking hot sex, accepting love and family, bucking tradition and a very happy ending.

Serena Yates says

A great second book set in Eoean society, this volume tells the story of Jess, best friend to Alexis (who was chosen by the lottery in book two), and Noss, elder brother of Elia (from book two). Even though this is not a direct sequel, it certainly helps if you read that one first. Many of the concepts of Eoean society are taken for granted in this book, and the basic explanation can be found in the earlier volume.

Jess has not had a good life ever since he came out. His parents were never the warm and fuzzy types, but

they really started to exploit him once they knew he was gay. When Jess arrives in Eoean society, and his first master has to sell him to cover his gambling debt, Jess doesn't expect much. He's always been discarded or forgotten, so when Noss tells him he only needs a concubine to be recognized as an adult by the Eoean law, Jess isn't surprised. What is a bit of a shock for Jess is discovering Noss's huge family. Noss's father had twelve concubines, with assorted "spawn" (their word for kids), and now that the prince is waiting for his trial, Noss has to take care of all of them. And they just love Jess!

Noss feels it is his duty to take care of the entire family. He is no Arak, the Eoean equivalent of a dominant male leading a house, but he doesn't think he has a choice. When he gets to know Jess, all he wants is submit to the Earthling. He thinks he can play a double game, but Jess doesn't like it, and Noss worries about it being permanent if his father gets convicted. Noss has a lot to learn – not just about this strange Earthling who uses slang he doesn't understand but also about himself.

If you like science fiction stories with men from two different cultures who discover not only their similarities, but get to know themselves a whole lot better, if you enjoy reading about "love working in miraculous ways", and if you're looking for a hot read that offers a romance with a few obstacles (of the internal and stubbornness-born kind), then you will probably like this novella.
