Toot Leslie Patricelli

A subject dear to children's hearts is in the spotlight as Leslie Patricelli's beloved baby character returns.

Everybody does it: Kitty, Doggie, Daddy — even Mommy! And when Leslie Patricelli's beloved bald baby does it while running, it sounds like a train. This frank and very funny look at a certain noisy body function is perfectly suited to the youngest of listeners, while their giggling older siblings will be happy to read it aloud.

Matt says

This is a long-time favourite of Neo's and so when he saw the board book at the library, we had to check it out. The baby discovers the wonders of toots and how everyone does them. Some are long and others are short. Some are silent and others resemble a trumpet. Whatever they are, babies love them and Neo cannot stop laughing as I read this to him. Potty humour... how amazing!

Kelli says

This feels like more of an adult book than a toddler book. It has funny illustrations but I hoped it'd be geared towards potty training instead of just "farts are funny."

jacky says

Natalie would give this five stars. She thought it was hilarious, and William tried to join in on the fun by repeating "poop" over and over and laughing. Its a good addition to a potty training reading list.

Emily Davenport says

Because I have the sense of humor of a seventh-grade boy, I found this book to be absolutely hilarious and delightful. As this book wisely states, "All toots are funny." :-)

EB Fitzsimons says

I cannot recommend this book highly enough.

Nicolas Laracuenta says

The prequel to 'everyone poops' This book really resonated with me.

Jessica says

A "serious" musical dissertation on the sounds of the human body....for "serious" scientists only.

Mihajlo says

Read it in a day, I just couldn't put it down. The end where you hear about the dad, I was like omg did NOT see that coming! Highly recommend.

Rebekah says

My preschooler loves this baby, but I can't believe I'm reading this book.

Kimberly says

If you are looking for a present for someone with a new baby, or maybe for a first birthday party, look no further than this book. Not only will baby love this book, mom and dad will laugh and laugh. We bought this for two friends with one-year-old boys and we got enthusiastic feedback from both sets of parents. This will now be a permanent fixture on my buy-for-baby list.

Samantha says

Funny in a omg-did-I-just-read-that way! This board book is about farts from cover to cover. The different activities that baby does throughout the day that are accompanied by a fart and the different sounds that mommy and daddy and doggy's farts make are all included.

Kids and parents alike should get a kick out of this one. Recommended for babies and toddlers.

Kelly says

I wish I would have written this.

Manybooks says

For certain, Leslie Patricelli's Toot is humorous and will likely be a hit with many toddlers, but I for one do find the absolute and total emphasis on farting, on flatulence, more than a bit tedious and wearing (and furthermore, I also do think that it is rather massively presumptuous at best for the author, for Leslie Patricelli to assume and expect that most if not actually all very young children automatically and by nature would and should be so obsessed with and by farting behaviours that it requires an entire board book just on that).

Combined with accompanying illustrations that while indeed bright and lively, are ultimately much too cartoon like and emotionless for my tastes, Toot is most definitely the type of specifically toddler-oriented board book that I can on a certain level perhaps appreciate somewhat, but can only consider funny and in any

way engaging for about two minutes maximum, with both text and images becoming almost instantly forgettable.

And finally, annoyingly, much of the presented textual content of Toot is at least in my humble opinion also rather massively generalising. For why should daddies (men) be depicted as generally, usually tooting loudly, whilst mummies (women) are described by the author as always, as mostly tooting quietly and clandestinely? Two stars for Toot and really only recommended for families with young toddlers who are seriously and lastingly enamoured of the featured topic, who consider flatulence and other such bodily function sounds inherently hilarious and shareable.

Marieke says

This is my favorite book right now.

Alex says

I feel that this is a book my wife will very much enjoy.
