## Deadly Echoes Philip S. Donlay

Donovan Nash is a man under siege, and this time it's personal. Eco-Watch, the premier scientific research organization he founded, is being blamed for a series of violent eco-atrocities that ignite protests around the world. Behind the attacks is Garrick Pearce, a man from Donovan's past, who is bent on a ruthless vendetta. Garrick has promised that after he annihilates Eco-Watch, he'll murder everyone close to Nash. Recoiling from the damage, Donovan enlists the help of Erica, a woman who claims she has information Donovan needs, but her knowledge makes her a marked woman. Running from trained killers, the FBI and even his own organization, Donovan races from southern California to British Columbia, then finally to Alaska where he joins Eco-Watch personnel and desperately tries to stop what promises to be the worst eco-atrocity in history. With his world in tatters and everything he built seemingly destroyed, Donovan is forced to make one last desperate gamble to stop Garrick and silence the man forever-a roll of the dice that may very well cost Nash his life.

#### **Deadly Echoes review**

Deadly Echoes is the fourth exciting thriller in the Donovan Nash series written by author Philip Donlay. Fast-paced, nonstop action.

### **Bruce G Johnstone says**

#### **The Donovan Nash Series's jus gets better**

From book 1 though 4, the series and script has come along in leaps and bounds. Whilst as previously stated I found book 1 very average the 3rd and 4th were entertaining, gripping and each an improvement on the previous.

I look forward to book 5

#### **Wow! What an intense ride! Glad I didn't miss it!**

Just as you're certain you know where the tale is going . . . there is a hidden sharp turn leading you to read as fast as you can to see what happens next!

Skillfully written scenes and dialogue, paired with nonstop action -- you can't miss with this one!

P.S. Upon finishing books 1 through 7, I can honestly tell you the quality and suspense and action are in every single book and I recommend them all!

#### **Another WOW Book!**

Another WOW book! It is an exciting and, yes, gut wrenching. I am amazed at the different unusual details to Philip's stories. I love details about flying airplanes. I also like the detail personalities.

If you love a great fast-paced mystery, you'll love this newest installment from Philip Donlay. I had the

pleasure to review this via Netgalley. In *Deadly Echoes*, Donovan Nash runs Eco-Watch, an environmental friendly company on saving the planet. But Nash also had a hidden past under an assumed name and lost a love a couple of years ago. But someone from the past doesn't want him it hidden and out of the open. He's out for blood and revenge, taunting him along the way. With an eco-twist, everything Nash loves and cared for are under attack and under siege by someone who's out for his blood--friends, family members and even Eco-Watch's vehicles. For Lauren, his estranged wife and mother of his little girl, a DIA analyst headquartered in Europe, she wants to keep Nash from a safe distance, until she's ready to see him again. From Hawaii to Alaska, and even parts of Europe and Canada, Nash, his wife Lauren, and his team defends them from all angles to prevent an eco-disaster from happening. Lots of action, drama, and an adrenalin rush from start to finish. Hold onto your hats!

### **Tania Godwin-evans says**

This book is all action from the get go and does not let up until the last page. The pace is relentless.

The characters are well defined both initially and throughout the story with flashbacks. You get to feel for the characters and hope that Nash will be successful in his mission. What I did find distracting was the author's constant references to very recent events (possibly what happened in the previous book) namely a recent injury and marital issues. Yet the plot twists make this for an edge-of-the seat read.

This book has everything that murder, mystery thriller readers love. Yet we know from early on who the protagonist is and what they are doing so it is more a case of cat and mouse than a true mystery thriller. Although this could be read as a standalone book, this reader feels that more would be gained from reading the entire series in order. The book is very well written with brilliant prose and this reader wished that they had started at the beginning of the series, so I will have to go back and start again.

Full Disclosure: ARC received from Netgalley for an honest review.

Donovan est un homme au passé trouble, sombre même. Fondateur d'une très grande organisation du nom de Eco-Watch, il reçoit des menaces de mort, mais avant cela ? Son monde va s'écrouler de manière à ce qu'il se retrouve seul avant de se faire tuer.

Crimes affreux, destruction d'un monde petit à petit, Donovan va être en plein coeur d'une course contre la montre, la mort, la vie. Il va tout faire pour sauver sa femme Lauren et sa fille Abigail, mais également ses amis et ceux qui travaillent pour la fondation. C'est un homme qui survit à tout, crash d'avion, tueur en furie... Mais son corps et son esprit eux, sont complètement bouleversé et meurtris. Il est influent et la découverte de son passé, que nous avons rapidement, sous la forme de Mérédith, une jeune femme dont la vie a été prit pour quelques billets, il y a de cela des années.

Changements d'identités, chirurgie esthétique, les personnages sont impressionnants dans leur facilité à devenir un autre.

Entre Lauren et Donovan, plus rien ne va depuis sept mois, d'ailleurs, elle a quitté le nid conjugal, emportant sa fille avec elle à Paris. Cette femme est très intelligente, douée dans tout ce qu'elle entreprend et surtout son poste est important pour qu'elle ait des gardes à ses côtés.

L'ennemi ? Il est vil, sournois, a subi de nombreux dégâts, anciennement prisonnier, assoiffé de vengeance et doué au jeu de couteau. Il sème des traces comme le petit poucet avec des cailloux, sauf que ce sont des morceaux de cadavres de ci de là. Il est tellement aveuglé par cette vengeance qui le ronge, qu'il ne voit même pas la vérité en face.

Beaucoup d'autres personnages sont importants, en plus de tous ceux déjà cités. Déjà il y a Erica, une jeune femme qui travaillait en clinique et qui échappe de peu à un attentat dans cette même clinique quelques temps auparavant. Elle est courageuse et peureuse à la fois et fera tout pour rester en vie. Il y a également Nikolett, Stephanie, Buck... Tous très travaillés, avec une vie et pour la plupart une mort.

J'ai trouvé le début long, surtout avec toutes les explications sur qui est qui. Je me suis même demandé si ce n'était pas un tome deux d'ailleurs, tellement je me sentais perdue. Et puis arrivé aux alentours de la soixante dixième page, cela a été beaucoup mieux. Une fois les bases posées, j'ai suivi avec beaucoup de plaisir le parcours semé d'embûches de Donovan pour traquer cet ennemi – dont nous avons le nom rapidement, mais les intentions restent floues, jusqu'à ce que nous en sachions plus au fil des pages.

J'ai beaucoup aimé la traque, la recherche, les petits cailloux semé qui nous font nous poser encore plus de question. Ce n'est pas un coup de coeur, car entre le début long et certains passages avec les avions et comment les piloter, m'ont fait souffler. Mais l'histoire est intéressante. Entre le FBI, la CIA, le Mossad et Donovan, les courses en bateau, en avion, en voiture, les émotions qui font le jeu du yo-yo... En d'autres termes, un thriller palpitant où la course devient folle en s'approchant de la fin. D'ailleurs, quelle fin, je m'attendais à certains cadavres et au final j'ai été surprise de voir certains personnages qui en avaient probablement marre de jouer dans ce livre – rires.

### **DEADLY ECHOES**

By Philip Donlay

I picked this book up thinking it sounded interesting. Boy, was I wrong. It was more than interesting. Fantastic comes to mind. So does gripping. Once I started, I couldn't put this book down.

Eco-Watch is a scientific research organization founded by Donovan Nash. It took Donovan a long time and a lot of sweat to build this international institution up to being one of the most solicited in the world. Its technology has been applied to protect the environment in ways other companies could not. But now it's being attacked by Garrick Pearce, the one person who knows Donovan's true past. Garrick wants to not only tell the world Donovan's real identity but to annihilate Eco-Watch and kill anyone close to Donovan. Garrick has a personal vendetta—he believes Donovan is responsible for Meredith Barnes's death, a woman who fought for the environment and whom Garrick was in love with.

From Alaska to British Columbia to Los Angeles and many other places in between, Donovan follows leads. Garrick taunts him with past pictures of Meredith. He is forced to commit his own crimes as he tries to protect his wife Lauren, daughter Abigail, and a new woman he meets—Erica. Donovan's marriage was already on the rocks and when Erica makes an appearance in Donovan's life, it makes Donovan's personal

life go from upsetting to terrifying. Erica holds information that can take down Garrick and his cohorts, but Donovan must keep everyone from getting killed, himself included, in order to use that knowledge. Not only is Donovan fighting to save Eco-Watch but he's also racing to save his family, friends, his marriage, and his personal past from being made public. If the world finds out who he really is, not only will Eco-Watch be ruined but his world as he knows it will implode. It's a race to the finish. From beginning to end, this is one thrill ride that I highly recommend.

Exciting action adventure with Donovan Nash and his wife Dr. Audrey McKenna. He has a secret billionaire past and dead fiancée. In this book, his dead fiancée's psychotic lover is trying to kill Donovan and run his Eco company. There is lots of action and many murders. I have read two other Donlay thrillers in the series for 99 cents and I highly recommend them. The others in the series are priced too high for my budget since I read a book a day. All of his books are very readable. James Cook

Great book. Very well written with wonderful prose. This is a series but this can be read as a stand alone story. Donovan's secrets will all be exposed unless he can find the man who is ruining the reputation of his company(Eco-Watch) as well as himself. A man out of Donovan's past has come back to haunt him, wanting him to pay for the death of his former love's demise. He must rush to horrible scenes of death to find clues as to where the madman will strike next. He is contacted by the only person to escape one of Garrick's terrible terrorist attack's. She is the key to unlocking who is after them. To Donovan's surprise it's not only the madman he must evade but also the FBI and possibly another terrorist group. I just wish I'd started at the beginning of the series. Now, I'll have to start at the beginning.

A great story! This is the fourth Donovan Nash book and I really liked Lauren McKenna's character in this one. She's awesome! I really love the Alaskan setting and the glacier drama! I thought it was highly entertaining and an interesting and intense story.

## Philip says

I received the book for free through Goodreads First Reads giveaway, but I was not required to provide a review.

Positives:

- 1) I have not read any of the other books in the series, and this book acted more like a stand alone book. I would have no issues with having a person read this book even if they had not read any of the others.
- 2) The characters were described well, and made you feel like you knew them.
- 3) This book has lots of action, and draws the reader into the story pretty quickly.
- 4) It just made me want to keep reading, I would find myself saying that I needed to read one more chapter, before setting the book down, and it usually would be more like 4.
- 5) It is an excellent thriller.

Negatives:

- 1) I am not holding this against the book, but to let people know. This is not a mystery like a few reviews I read stated. It is a thriller/action.
- 2) There were a couple sex scenes, but they were pretty mild, so it would not limit the audience that much. They were mostly just references.

Conclusion:

For anyone who enjoys a good thriller or high action book, I would definitely recommend it. I enjoyed it to the extent that I will probably start reading other books by this author. It will draw you in, so make sure you have the time to read, because you may not want to put it down.

## Craig says

This is the second Donovan Nash book I read. I really want to like them. The stories are interesting and engaging. However, whenever the author deals with situations or plot devices based on science or technology, he just makes stuff up. If you can deal with the eye-rolling inaccuracies of scientific or technological subjects, you'll enjoy this book. If you need something more believable and realistic, I'd recommend passing on this series.
