## **I'm in Heaven** Terry Ravenscroft

I'm in Heaven is about a man who doesn't believe in God who dies and inconveniently goes to heaven. However it is far from being the heaven that many people believe it to be - all sweetness and light and lazing about on a white cloud with angels playing harps - but something far, far different. For example Sir Michael Caine is there. And Robert de Niro and the Beatles. And, surprise surprise, Jehovah's Witnesses don't like being there one little bit.

### Elaine says

This isn't a book that will have you rolling on the floor laughing your ass off, I think some reviewers on Amazon are exaggerating a bit there, but it is a very good book indeed and there are a few chuckles in there, as well as some sad moments and, indeed, many things that will get you thinking about life and death.

In particular, I found the first half of the book quite moving at times. The book is split into four parts, the first dealing with Norman's reaction to the diagnosis of terminal cancer and the treatment he is given. It also includes a lot of reflection on his life which turned out to be quite sad, for me. That part for me, anyway, was one of the main messages of the book - you had a main character who had been diagnosed with a terminal illness looking back over his life, and the message clearly was that, due to personal circumstances, he hadn't actually started to live yet and in order for him to do so he had to die and go to heaven. One of the most poignant passages is when he is thinking about all the "the 101 things to do before you die" lists and realises that it's a waste of time because he can't actually afford to do any of them.

His time in heaven is detailed in the second part of the book and I have to say, I quite hope that heaven IS as it is portrayed here! It was really nice reading about how Norman finally got the life he should have been able to live on earth. It would have been wonderful to leave Norman having such a wonderful time there but the author (and the devil) had a few tricks up his sleeve and the story is a long way from being over, but to say more would really spoil the plot.

It is a very well written story, at times sad, happy, witty and sarcastic and Norman is a character you really grow to love, like the archetypal underdog who everyone roots for and wants to win in the end. A fantastic little book that I can really recommend to anyone.

A very weird but funny book. Looking at Norman's experience of life, death, heaven and hell! It was quite funny in places and generally kept me entertained! Certainly a view I have never considered!

Having read Dear Air 2000 I settled into what I thought would be another fantastic read but it didn't do it for me at all.

Norman's earthly life is not up to much, a demanding mother, unemployed and a diagnosis of terminal bowel cancer. He does not believe in religion so imagine his surprise when on dying he ends up in Heaven and because Heaven is what you make it loves the place. Unfortunately his death was a mistake and his return to earth is not what he wants at all and so does everything in his power to get back to his personal nirvana.

I really enjoyed the first third of the book but then it all went downhill for me and it was a rather bland tale. I didn't hate it, just found it OK .

Started out quite funny, although I did feel a bit guilty laughing over someone with cancer. The time in heaven was alright with the fantasy but it went downhill after that. The ending was pretty poor
