**A Year Like None Other** Aspen in the Sunlight

Fandom: Harry Potter

---

A letter from home? A letter from family? Well, Harry Potter knows he has neither, but all the same, it starts with a letter from Surrey. Whatever the Durleys have to say, it can't be anything good, so Harry's determined to ignore it. But then, his evil schoolmate rival spots the letter and his slimy excuse for a teacher intercepts it and forces him to read it. And that sends Harry down a path he'd never have walked on his own.

It will be a year of big changes, a year of great pain, and a year of confronting worst fears. It will be a year of surprising discoveries, of finding true strength, of finding out that first impressions of a person's true colours do not always ring true. It will be a year of paradigm shifts.

And from the most unexpected sources, Harry will have a chance to have that which he has never known: a home ... and a family.

A sixth year fic, this story follows Order of the Phoenix and disregards any canon events that occur after Book 5.

## From Reader Review A Year Like None Other for online ebook

### Lisa Foulke says

I haven't read this in years. I'd forgotten how long it was (790,169 words). Still very, very good.

My preference for Harry Potter fanfic is Harry and Snape. My second choice is Harry/Snape/Draco. This was a father Snape and brother Draco. And a really foul Lucius Malfoy.

I had a hard time with this Draco. I like to like Draco, and he was pretty unlikable sometimes. I guess that means it's more realistic, because canon Draco was far from likeable. Still.

### Sacha says

LOVED this. Very much in doubt whether I like HPMOR or this one better.. I think I'd say this one, because Snape and Draco play such a big role and I love them.

### Eri says

- fanfiction
  - VERY LONG
  - plot heavy
  - no PWP, no slash, family friendly material
  - actually family heavy material, lots of family bonding, character development, no unnecessary love plots and interests
  - slythegrif and paperwork loopholes
  - abuse of your beloved characters warning. they are in a bad place but it gets better.
  - happy end
  - no seriously this thing is really long, so seriously think twice before saying 'one more chapter'

Didn't really know what to expect – turned out to be one of the best fics I've read; what a beautiful, heartwarming, captivating story (Cursed Child's quality not even close). I expected, especially in the second part towards the end, that there'd be a confrontation/discussion between Snape and Harry why Snape was like that in the first place and treated the kids in such a manner (because he loved Lily) but this part of the story is never revealed to Harry (who probably just went for the Snape's-childhood information he got as a justification of Snape's behaviour), though I get there are probably some strong canon relationships better to be left alone so they don't overshadow the major ones here (still I feel the authors wouldn't have any problem with the delivery so maybe in the sequel? Guess I'll have to read that one too to know).

Plus it's brilliantly written (better than some “best-selling” books) and structured, I'd point out just tiny little

ooc moments (but still am happy and so content how all the characters were in place) but honestly, despite the length, there wasn't a single paragraph or storyline that would be unnecessary or boring, which made the reading even more special.

### **Kimberly says**

It had its share of weird moments, but overall I loved this fic!

### **Eva says**

listen...do i KNOW that this is niche fulfillment of everything i WANTED the hp books to be and they weren't? absolutely. will that stop me from reading all 800,000 words of it? HECK no. the joys of rediscovering old classics like this will never be old.

### **Meshi Black says**

The best Harry Potter Fan Fiction ever written! Fourteen is the number of times I've read this book. And everyone I've recommended it to loved it.

### **Deeze says**

One of my all time favorite Harry Potter fics. This one just blew me away with the authors creativity, taking the HP universe and just running with it. Great for HP fans.

### **Sannah says**

So... this was a very atypical fanfic, with lots of story and angst and character developement, and I think the characters were fairly well drawn. I initially gave it three stars, but I think Tat's mostly cos I read it straight after 'HP and the methods of rationality', and well, even the orriginal doesn't stand up well next to that. I've raised it to four, I just hope the final confrontation with voldemort is as story driven and dramatic.

### **Kartanecikleri says**

Aslında 1500 sayfa idi neden 3000 yazıyor anlamadım. Böyle konulardaki fanfictionalar? seviyorum cidden ? karakter gelişimleri çok iyiydi.

---

### **Kelly says**

one of my favorites - read it almost as many times as the Harry Potter series!

---

### **Toni Cowart says**

I'm constantly rereading this fanfic, I love it so much
