Stanley Costkow says

A great series.

"OSC" is responsible for my many into the late night "readathons." I am not really complaining, I am just a little bit exhausted but fully satiated, until, of course when I start a new series of "OSC."

Benji says

First, second, and last were fantastic. The middle was sorely lacking.

I think, as the Ender books go, that this series trails off a bit. A writer can only go so far from his expertise before it shows. The reliance on Ender's jeesh during world political events was simplistic. Graff was smart, and so were the people who hired him.. I must assume that world politicians are not stupid, and politics is more complex. Otherwise, an excellent read.
