### **The Bookish Hooker says**

I was provided a copy of this book by the publisher and Netgalley in exchange for an honest review.

I'm not sure I've ever seen a sweeter counting book than this one. We visit the little barefoot critters in their cute village (there is even a map at the first of the book showing all of the sites we will see.) Starting with the number one and a solitary critter enjoying a bit of reading, we work our way through different scenes adding a new animal friend and a new activity, such as making pancakes, playing pirates, and swimming, as the book moves along. The illustrations are simply precious. The colors are very pretty and eye-catching with a fall-like color scheme. The woodland creatures are whimsical and cute. There is also enough detail in the drawings to hold the attention of any small child. My daughter, who is four, kept softly saying, "Aw!" at each turn of the page. The rhyme is very smooth and even, which makes for easy reading aloud. This book is so beautiful that I will be purchasing a hard copy when it is released. In hardback, this would be a wonderful and cherished book for a baby shower or even a first birthday.

This was a brilliant little book and it was really enjoyed. The images are great and I loved how it rhymed. Will definitely be looking to purchase a hard copy to keep.

Okay, so Teagan White is who everyone has to beat y'all. Queen of children's books. Get this lady an animated show on Nick Jr.

This is the second Barefoot Critters book and it's all about counting. It starts off with one little critter reading a book. More critters join in the fun and come to play as the book progresses all the way up through twelve. The story is written in rhyme and it flows beautifully. It's the perfect companion book to Adventures with Barefoot Critters, especially if your child likes super cute animals and beautiful illustrations.

This book is written in rhyming verse that anticipates the next number, counting up from 1 to 12. The rhyme helps a preschooler remember the number on the top of their tongue. So clever Teagan White! I also love the

illustrator's style!

### **Jagoda says**

Beautiful illustrations and really interesting story.

Some activities, like a quiet reading, is perfect for one barefoot critter. Cooking pancakes is great for a pair. But a race is better with five, and nine is the best number to play in the fort. And what about when crossing the dark spooky forest? Better if the whole dozen of them is there, so there is nothing to be scared of!

Counting with barefoot critters is a counting book in beautiful rhymed prose and full of cute illustrations. At the beginning for the book there is a amazing map to follow the critters adventures. It is a great option for a read aloud time. I'm interested in read a previous book in this series, Adventures with Barefoot Critters, which plays with the letters and seasons.

I received this copy from the publisher via NetGalley in exchange for an honest review.

3.5ish stars.

A counting book that distinguishes itself from countless (haha) others by use of really lovely, critterful (that's now a word) illustrations including a numbered map at the beginning and some cute rhymes and sequencing. The rhymes act as hints to allow young listeners to predict the next number and the sequential story subtly promotes a decent message as well. I'd probably use it primarily at home, possibly as a bedtime story.

The kids really enjoyed the way the rhyme cued them to count the numbers. They also loved the map at the front and finding the new friend on each page. Lovely details, we spent more time looking at the book than I expected.
