Lindsey says

I am a huge television and pop culture nerd so for me this puzzle book was a lot of fun. The illustrations were really cute, and the puzzles were challenging but not impossible. I got the book today and I sat down with it until I was able to get every single show. And since the illustrations were in black and white, after I solved all the puzzles my daughter and I colored them in. I hope there are more in this series. It was a great way to de-stress and spend some time focusing my brain on something entertaining.

I received an ARC of this book in exchange for an honest review.

This was a fun book to look through. Some of the clues were really easy and some I didn't have a clue about. I guess it just depends on what shows you are familiar with.
