# Inventing the AIDS Virus

*Peter H. Duesberg , Kary Mullis (Foreword by)*

**Inventing the AIDS Virus** Peter H. Duesberg , Kary Mullis (Foreword by)

An eminent scientist and pioneer in the discovery of retroviruses challenges the widely accepted belief that HIV is the cause of AIDS. Peter H. Duesberg argues that HIV is merely a harmless passenger virus that does not cause AIDS. Sure to spark intense debate, this provocative book offers an original and incisive critique of the rise and fall of HIV.

## Inventing the AIDS Virus Details

Date : Published May 1st 1998 by Regnery Publishing (first published September 25th 1997)

ISBN : 9780895263995

## From Reader Review Inventing the AIDS Virus for online ebook

### Jonathanstray Stray says

I thought it was sort of awesome at the time... now I think it's very unconvincing, and the sort of misinformation that people die from (e.g. HIV denial in South Africa)

---

### Brian says

Dr. Peter Duesberg claims that HIV does not cause AIDS. Instead, he says that AIDS is caused by chemical factors and malnutrition. HIV is a harmless passenger retrovirus. The author is hard to dismiss since he is a professor of molecular and cellular biology at UC Berkley, was inducted to the National Academy of Sciences, is an expert in retrovirus research, and was one of the first scientists to discover cancer genes.

---

### Faye Stephens says

Duesberg makes me angry.

---

### tom says

AIDS denialist falsehoods from a crook who should be in jail.

---

### Iami Menotu says

Well written, but like a lawyer's plea has guile, ignorance and skill

---

### John says

A must read for anyone who has HIV/AIDS

---

### Douglas Wilson says

Simply great.

---

## **Yolanda says**

A solid book with solid science. If only the pro-AIDS establishment could be so truthful in their research outcomes. I, too, see Duesberg as one day being heralded as a hero. I'm hoping it's before he passes, because this murderous streak has to come to an end. There are too many people dying due to misinformation and the drug companies quest for profit over truth.

---

## **Seth says**

This amazing book makes a good case that HIV is NOT the cause of AIDS. Duesberg is not a crank. He is a major cancer researcher, and he is supported by a number of Nobel Prize winners.

Here, for example, is the 1993 Nobel winner in chemistry, Kary Mullis: "We know that to err is human, but the HIV/AIDS hypothesis is one hell of a mistake. I say this rather strongly as a warning. Duesberg has been saying it for a long time. Read this book."

The fact that Duesberg was greeted almost entirely by ad hominem attacks rather than factual rebuttal reinforced my suspicion that the establishment has it wrong on this question. The house of cards is gonna come down before long, and when it does, Duesberg will look like a prophet.

---

## **Gael Fichet says**

Ce livre est la pire des machine de guerre dont le but n'est en rien de protéger le faible et l'innocent. Son auteur dont la perversité a depuis longtemps atteint sont comble, n'est autre que le chantre du déni le plus meurtrier et le plus abjecte du nouveau millénaire. Lire ce livre n'est en rien comparable a lire un "Mein Kampf" dont la portée semble éteinte, c'est bien pire encore. C'est à vomir de scepticisme incongru. Voici peut-être une prochaine victime pour l'entarteur fou ou peut-être faudra-t-il inventer un crime d'orgueil.

---

## **David says**

Incredibly powerful. Your views on HIV and AIDS cannot remain after reading this book. Despite being published in 1996, just about everything it says is valid today.

---
