## Cats are Weird and More Observations Jeffrey Brown

Cartoonist Jeffrey Brown's drawings perfectly capture the humor and quiriness of cats in all their strange and charming glory. Following the success of *Cat Getting Out of a Bag*, this all-new collection of color and black-and-white comic strips loosely follows the adventures of a pair of cats as they explore the world around them, indoors and out. Adventures include taking a nap, licking a shoe, attacking dust particles, hiding in cabinets, pouncing on fallen leaves, confronting the vacuum cleaner, patrolling the yard, and purring up a storm all adorably rendered in Brown's immediate and irresistible style. Sure to delight anyone who lives with cats and appreciates their sweet and batty behavior, this beautifully packaged gift book is the cat's meow.

### Charlie says

I'm not sure how to rate comics like this but it was hilarious so I'm giving it 5 stars.

This pretty much exemplifies why my partner wants a cat and why I don't want one. Yeah they're funny and cute and a little odd but they're also annoying and irritating and somewhat evil.

This was a really fun read.

### Samuel says

The cats are cute enough, but otherwise, I was pretty disappointed by this one. The cartoons themselves seemed to stop at the level of "these sure are some things that cats do," rather than adding much in the way of observations, or commentary, or humor. The situations are recognizable...but that's all. Any given volume of Garfield is funnier than this, and I don't even particularly like Garfield.

### Brian James says

This comical study of cat behavior looks at the many remarkable qualities of feline nature. Staples of the animal's evolutionary oddities such as the inexplicable fear of the vacuum, the inability to sit without wandering in circles first, the impromptu sneak attack, and a cat's instinctive desire to prevent humans from accomplishing work at a desk are all covered here in hilarious detail.

Any cat owner will recognize the many instances that Jeffery Brown chooses to illustrate. The take on peculiar cat behavior is spot-on and the simple, expressive drawings capture the joy we find in observing such peculiarities. Told in one page cartoons, or two-page spreads, the panels tell a slice of life story in comic strip fashion. Readers of all ages will find some moment in these pages to laugh out loud.

### Judy says

This is about cats and how awesome and strange they are.

I was greatly amused by a review that said that the reviewer wished this book had more substance.

My cat is currently sitting on the couch, licking his tummy. His gut is very substantial.

### Andrew says

This is in the same style as "cat getting out of a bag", a mix of cat observation with humorous cartoon style illustrations. If you have ever owned or lived some time with a cat (after all who owns who) you very quickly start to recognise their antics in this book. I think the most entertaining ones are those where you think "yes my cat does that, yes just LIKE that" and that is where i think the appeal of this book really lies. Great read and one I think I could go back to time and time again (rather like the Simons Cat series) and still raise a smile even though I recognise each page instantly.

### **D'Anne says**

This book is adorable. If you like cats you will like this book. If you like cats but don't like this book you are dumb. If you don't like cats, well, that doesn't make you dumb. But you might still like this book.

### **Xanthi says**

A gently amusing book for those of us who have lived with cats. My favourite was 'The Look'. We've all been on the receiving end of that one!  
I liked the stylised drawings of the two cats but I also liked the more realistic ones of them, scattered throughout the book.

### **Rachel says**

This book has made me desire a new feline in my life. Perhaps that is the point, to affirm a love of cats.

### **Rizal says**

People with cats would appreciate this.

Simple, not much texts, and adorable.

### **Sara says**

This was my old cat to a T!

### **Cale says**

There's a key word in the title of this book - observations. This is not a collection of humorous comic strips (although some are lightly amusing). Instead it's a short-hand observer's notebook of cat incidents. As a cat owner, a lot of them are very relatable; my cats do a lot of what he's documented. But my problem with this book is that it just observes; there's no commentary. Cats are weird? Okay. Why should I care? There's nothing here that justifies the collection. No humor, no deep thoughts, no exploration of how cat weirdness affects us, or should. There's some well done drawings of cats, some less well-done strips that feature cats doing cat things, and no... soul. There are lots of cat comics out there, and I would recommend you look into those. This is... okay. But you can do better.

### **Joy says**

Why yes, I am a crazy cat lady who loves comics. How could I not like this book? It helps, of course, that the observations are spot on.

...read most of this book with a cat snoring on one arm and another cat curled up next to my hip. It's not a bad life.

### **Kylie Kaemke says**

What a cute comic about how weird cats are!
