LunaBel says

An impersonal account of the encounter of two killers and the supposed-to-have-been witnesses of the murder of a man. Even if there is no narrator other than the implied author, the story is captivating even if it is so simple.

Read in The Snows of Kilimanjaro, and Other Stories.

Synopsis: Two men go in a local diner one night. They're looking for another man because they want to kill him.

Talkative killers. They tell their plan to the young man working the counter at the local diner. A lot of nothing happens. Really enjoyed it.

Dr.Helesfai says

I read it after watching the 1946 movie adaptation. Deliberately very minimalistic. Maybe a little too minimalistic for me. I am glad this was not my introduction to Hemingway's short stories... In my opinion, the motion picture was a very effective expansion of the original short story. I recommend both. The movie is a film noir classic.
