Sam says

I have to be perfectly honest I have finished this book and am so confused as to what I have read and what was the meaning. The story jumps from a plane crashing, to the thoughts of a fish, to mad dogs, yes there are aliens. What is real and what is not someone will have to explain to me. The characters were dull to the point where I didn't care if they lived or died. And then it just abruptly ends and the villainous alien is gone. I received this from LibraryThing Members Giveaway and I do not recommend this book or I should say read at your own risk.

Sonia says

I won this book though a giveaway on goodreads and I really enjoyed reading it I thought it was a very light read and also fast-paced read. I really enjoyed reading the story. :)
