Cyborg

Anna Hackett

Cyborg Anna Hackett

Scientist Ever Haynes was shocked when she was abducted by alien slavers...but the last thing she expected was to find herself pregnant with a cyborg's baby.

Ever has been fighting for her life since her abduction, and the only good thing to happen to her was one heated night with a mysterious prisoner--a connection, a flash of light in the darkness. But then he was rescued and she was left behind. Now, weeks later, she's been saved by the House of Galen gladiators...and by the man she shared the hottest night of her life with. But cool, emotionless cyborg Magnus Rone has no memory of their night together and finding out that she's expecting his baby is a shock to everyone.

Created in a military program, Magnus is genetically and cybernetically enhanced--emotionless, ruthless, focused. He vows to protect Ever and the baby she carries, and despite his lack of memory, everything about tough, levelheaded Ever draws him in. All his life, his emotional dampeners and training have limited his ability to feel emotions...but one small Earth woman cuts through all that and leaves him feeling.

As they work together to hunt down the deadly desert arena of Zaabha and the final human woman trapped there, Ever and Magnus find a stunning passion neither can resist or ignore. But in the dangerous desert sands of Carthago, with the House of Galen gladiators by their sides, deadly enemies are closing in. Ever and Magnus will be dragged back into the darkness, and Magnus will do anything and sacrifice everything to keep her safe.

Note to readers: This sci fi romance contains a lot of action (think wild gladiatorial fights and daring rescues), tough gladiators (the warriors of the House of Galen and the House of Rone) and a steamy romance (between a sexy, emotionless cyborg and a resilient survivor from Earth). So if you like it fast, and gritty, and sexy, this is for you!

Includes a preview of Marcus, Book 1 of Hell Squad.

Ashley says

I am so glad we finally have Magnus's story and it was so good. I couldn't put this book down. Sadly, we are finally seeing the end of this series which is depressing because its one of my favorites but the series can't go on forever. And I know Hackett will end it with something great.

I cannot wait for the next books, which is supposed to be Galen's story.

Alex (HEABookNerd) says

Series: Galactic Gladiators #10

His woman from Earth had a steel-hard spine, grit, and the heart of a cyborg. She terrified him.

Ever Haynes has been through the ringer since being kidnapped by the Thraxians and sent to the deadly fight ring of Zaabha. Her one solace was her night with cyborg Magnus Rone after he was captured and thrown in her cell. **Finally rescued, Ever is pregnant with Magnus's baby but the man she's falling for doesn't remember their night after a malfunction to his cyborg systems.** Magnus uses his emotional dampeners to keep everything out but Ever short circuits him in a way he's never experienced. Determined to take down Zaabha and rescue the last human survivor, Magnus and Ever refuse to give up on their mission no matter how dangerous it gets.

I devoured *Cyborg* in a single night and it's action, adventure, and romance was all a wonderful mix. **The Gladiators are getting closer and closer to taking down Zaabha and I can't wait to see those sandsuckers defeated!** With Sam Santos still held captive by the Thraxians the gladiators and other humans are working overtime to locate the fight rings and bring her home. But that's not Ever's only worry and since coming to stay at the House of Rone she's fighting to find the man she remembers inside the cyborg. **I really loved Ever's compassion and her refusal to give up on Magnus.** She's been through so much but she never gives up nor does she cower from her fear. She's wants to stay far away from Zaabha but her honor demands that she fight for Sam like Sam did for her.

Protecting Ever and their unborn baby is all that matters to Magnus and though he can't remember their night together he knows that Ever is important to him. **Magnus was a great hero and his devotion to Ever was so sweet from a character who's been so stoic.** Bred and raised to be an assassin, Magnus is used to being on his own, so opening up to Ever and admitting his feelings is hard but he's also tired of being alone. If anyone was in need of a hug it was Magnus and I'm so glad that Ever was willing to fight for her man!

I won't give anything away about the ending but I can't wait for Galen and Sam's book after that preview we got. I've been anxiously awaiting Galen's story from the beginning and it looks like Sam is going to give him a run for his money. Knowing that we're approaching the downfall of Zaabha I worried that this series was coming to an end but a note at the back of the book has me excited for more gladiators. And, fingers crossed, the cyborg Jaxer will be one of them.

## **Tiblu says**

### **Love the series but didn't love all the heroines....**

I'm sad to see the gladiators series coming to an end, this is where I first truly discovered Ms. Hackett and her wonderful solid writing and for that I'm forever grateful....

Thank Ms. Hackett for becoming one of my favorite writers....

I don't say that easily but your work has earned my trust, because I know what I'm getting when I pick one of your books....

And that's a beautiful thing, I know your going to give a decent and well thought out story and the chances of my fears or triggers being kicked in are slim to none...

And from some of the things I've come across since I started really serious reading 4-5 + years ago, plunging back into the romance genre, that truly is a grand and beautiful thing...

I say because everything we read and say and to just like the ppl we met inside out outside of books on a daily basis leaves its mark on us...

Becomes a part of us, some good, leaving stronger and a lil smarter maybe and hopefully excited and energized to get up, and face another day better than before...

While some bad, we find books not meant for us (not sure who with some) that leave a littler hurt or scared, a little less of our selves from we experienced, wanting to pull in and forget what we'd climbed in to hoping for a pleasant or uplifting escape only to have been knocked down instead ....

Books that changed a small part not necessarily for the better, but we try to be stronger for the worst, fighting the lingering effects that if we left it still bring a chill...

Some, too many it feels at times, treat all this as frivolous fantasies but we all need that "safe" place we can escape our daily cares and woes where we already know there is unlike life around and it's plans, a HEA is there in the stands, hard worked for and won that's true, but there it's waiting to come shining thru...

Thank Ms. Hackett, please know you are appreciated, lol even if my review isn't abbreviated...

Lol, sorry I got in a rhyming kick, and I'm not good at being quick ..lol..

I didn't love all your h's, some were too self absorbed or too hard, never wanting to let down their guard, some too stubborn to be negated, then I can say I almost hated (lol, make it stop, the rhyming is out of control) but in the end I'll tell you, I be really sad when this story is thru...

I think I read too much Suess as a child ...

Btw I doubt it would surprise you I write poetry at times ...

Usually when I'm upset to get my feelings out ...

I highly recommend, Thank you ..

## **boogenhagen says**

I love Anna Hackett books, they are my favorite mind candy. The H's are ALWAYS fabulous, the h's are fiesty and I like them. I just have the best time reading these, it always gives a happy lift to my day.

These books are like a permanent

Always sending the Love!

---

### **Dawn says**

I've given this book a 3 out of 5 only because the series seems to be dragging for me at this point. It's the same thing over and over again. Rescue the human woman, and then the book is spent trying to find the other human woman to rescue which they do but something always happens at the end where they find out there's more humans or something.

Pretty sure the next book is the end of the series, and even if not, it will be for me.

### **Marta Cox says**

Four and a half

I do enjoy these stories set on planet Carthago about the gladiators who live there and the humans who they have taken to. This time it's analytical, cyborg Magnus who is getting his world turned upside down by human and ever so very much pregnant Ever ! Magnus might not remember their previous encounter but he will do anything to protect this stubborn woman and their unborn child. Trouble is Ever has a mind of her own and a pretty sneaky way of getting Magnus to do what she wants. Yes those annoying pregnancy hormones just might be the undoing of uptight, unemotional Magnus !

As usual it's a fabulous trip to a planet where the unimaginable can so easily happen. Slaves, gladiators, aliens, action and romance makes this series such a joy to read. I loved this couple but strongly suspect that as we are now in sight of the long awaited book featuring Galen that there will be an awful lot of fans willing the author to write faster ! For now though it's all about Ever and her cyborg so enjoy this story whilst dreaming of a gladiator of your own !

This voluntary take is of an advance copy and my thoughts and comments are honest and I believe fair.

---

### **Mei says**

Another good addition to the series!

---

### **Lee says**

Very sympathetic leads, hot love scenes, and excellent fight sequences. The book is formulaic, but the engaging characters and variety of monsters and traps kept me entertained. New beasties and weapons show the author keeps coming up with fun details.

Don't read this as the first book. Start earlier in the series so you have more context for Carthago and Kor Magna.

I received a review copy.

## Mskychick says

Magnus must have been a pretty crappy assassin, since he doesn't seem to exhibit many battle smarts. Sure, he can pound stuff into oblivion, but the planning and reacting part seems behind him.

And wth is it with TSTL females insisting that it's appropriate that they go into dangerous situations where they'll just be a liability if anything goes wrong?! Spoiler alert: this is life. Things always go wrong.

---

## Ira says

4.5 stars.

Well well, well you just can't get away from secret baby stories!

How that will work with an Alien Guy and he was a Cyborg nonetheless! Lol.

I let you to read it.

I like this one very much, our hero is so different and he came from a different Gladiator House.

Btw, none of those where the heroine try to hide the baby from the hero in purpose story.

All good and you will love it too, if you like secret baby story, that is! ?

Just in case you interested, this hero house with his bunch of gladiators will get a new series next year! ?

I can't wait!

♥?♥?♥?

---

## Paraphrodite says

4 stars.

He might not be the House of Galen but cyborg Magnus, the Emperor of the House of Rone is just as alpha as any of the other gladiators. Looks like it's true when they say "cold hands, warm heart"!

Looks like we'll be getting Galen's story next...finally... hope that doesn't mean the end of the series though. I am actually interested in seeing more of this alien world of Carthago outside of the Kor Magna Arena.

## Deanna from Deanna's World says

I can't contain my excitement over Cyborg. I read it the moment I got my grabby little hands on it. A cyborg imperator with no feelings, a fierce, tenacious, and pregnant human woman. Desire runs high and personalities clash as Ever and Magnus remember their time together in the desert.

Ms Hackett is a go-to author for me. When I'm not sure what I want to read, or when I want to read something I know I'll love and enjoy, I will pick up one of her books. They never fail to entertain me with high action adventure, fabulous worlds, and of course, heroes and heroines I know I will love. I am always left with a good feeling after one of Ms Hackett's books. And with Cyborg? I'm just feeling all googly-eyed and lovey-dovey. I want my very own Magnus.

I've been fascinated with Magnus ever since I met him in the previous Gladiator books. He seemed so silent and unapproachable but as Ever discovers, underneath that is an honorable and protective man with a noble streak a mile wide. I loved watching Magnus thaw and start to allow himself to feel under Ever's persistence. He was magnificent once he finally lets loose. Of all the gladiators I've read, Magnus is my favorite. I think I might lick him cos ya know, if I lick him, he's mine. :-p

Like all the Earth women in this series, Ms Hackett has made Ever strong, resilient and determined. Even while heavily pregnant she fights for Sam's freedom and insists on being a part of her rescue. The moments when Ever reveals her softer side, is a little fragile from the pregnancy with Magnus looking after her are my favorites. Don't get me wrong, I love that she's a strong woman but I like that she's not afraid to lean on someone else's strength when it's needed.

Honestly, I'm utterly tickled by the pregnancy. I'm a traditionalist at heart when it comes to my romances, and weddings and babies make me happy. Seeing Magnus' protectiveness over Ever and the baby was beautiful.

This is my favorite series by Ms Hackett. I can't wait for the next book. I think it's Galen's turn next and man, it's going to be great to see that tough, competent man fall.

See more from Deanna's World

### **AvidReader says**

As always I enjoyed this Anna Hackett book too.

But not as much as some of the previous ones. In the beginning I struggled a little to connect with MC's or may be it was because I had high expectation for this book. The last chapter made me swoon. Many new characters from House of Rone was introduced. I hope to be introduced to new 'houses' in next book. And I'm eagerly waiting for each and everyone of their stories. Yes you guessed right I can never get enough of this series.

Definitely recommended.

---

### **Amyiw says**

[that have always had capture, yes they go out into the desert and get captured (hide spoiler)]

---

### **Dísir says**

In Anna Hackett's Gladiator universe, it feels as though anything is possible. And that much frees the narrative to range from far-flung sand-dune adventures to ancient Rome-type fighting for sport and commerce.

With a stoic, near-emotionless cybernetically-enhanced guy suddenly thrust into the emotionally-laden sphere of impending childbirth with a woman he'd apparently been kidnapped with, I felt a little lost at sea here after the sudden shift in focus from the House of Galen to the House of Rone—like I'd been thrust into a backstory that I had no clue about at all, only for it to have been narrated almost as a throwaway line.

Nonetheless, 'Cyborg' feels like the book that's leading us to the edge of some precipice that Hackett hasn't yet thrown us over...as though it's the penultimate book of a series that has mainly dealt with the systematic rescue of more earth women from unscrupulous traders and aliens, as the House of Galen and the House of Rone fight to dismantle illegal fighting rings and stop the kidnappings. Magnus Rone's book continues this similar storyline with a different couple so it did seem a bit repetitive for me, though it's always great fun each time to read the new things Hackett comes up with when the action scenes finally roll around.

The slight bit of a cliffhanger here is an excellent hook for the next book, though Hackett's fans would barely need it at this point in time.
