The Rising

Daniel Greene

The Rising Daniel Greene

You either build your world or you burn in someone else's.

With every fleeting moment, the whole world draws closer to being overcome by the deadliest virus known to man.

Steele's family home lies in burnt ruins on the shore of Lake Michigan. His group hunts for his missing mother in the apocalyptic wilderness filled with the dead. Instead he finds a group of refugees badly in need of his skills learned in the shadow war on terror, for they are persecuted at every step by the Chosen, a group of fanatics hell-bent on creating God's Kingdom in the rubble of society.

Dr. Joseph Jackowski finds himself in a dangerous battle against both the deadly virus and the clock inside the bowels of the Cheyenne Mountain Complex. His team struggles as their own members fall victim to the virus in a race to discover a vaccine.

Colonel Kinnick rushes his paltry forces into the rocky passes of Colorado to hold the dead off long enough for a vaccine to be found. If he fails, the Vice President will burn the entire Western Seaboard into the blazing inferno of a nuclear holocaust.

Who will rise? The Living or the Dead?

Read the series that readers are calling, "An epic, fast-paced adventure, featuring a diverse cast of characters, non-stop action, and of course, zombies - this apocalyptic thriller is a sure victory..."

In the epic third installment of The End Time Saga, Daniel Greene brings the brutalized remainders of humanity even closer to the edge of defeat.

From Reader Review The Rising for online ebook

Christy Ricker says

Daniel Greene hits it out of the park again with this sequel. I loved the addition of new characters all the while keeping the reader in tune with main ones. It's great when I get a hold of a book that I can't put down and this didn't disappoint, especially with the new bad guy. Right from the first page the story draws you in. The military aspect of the novel made it all that more believable with hard choices that have to be made. Makes you think a lot about what if? Felt like I was on a roller coaster, can't wait until the next one comes out!

Bob Platypire says

I was provided a copy of this book to be honestly reviewed

MAN! This series is just amazing! There's no time to think, no time to put it down, no time to BREATHE! The action is fantastic and heart-pumping, and I really like the characters and their various personalities, the way they both mesh and collide. Fabulous writing over all, just awesome. I'd love to get audibles of these, though I'm not sure those exist (yet). Definitely a must read for those who love a good, rough apocalyptic tale.

Bob says: 5 Platypiress!

Lisa Omstead says

The Rising is my favorite story of the End Time series as it really packs a punch. The characters and plot are complex and believable. Twists and turns make this a suspense junkie's delight. Highly recommended! Looking forward to reading more from this author.

Dan says

This is the best entry into the End Time Saga yet! The story is action packed and a lot of fun to read. Greene continues to write fast-paced and complex story lines surrounding an ever-evolving cast of characters. I never knew what was going to happen next which left me excited and engaged the entire time. This is a great book!

Katie Scott says

Can't wait for the next one!

Absolutely love this series and I'm gutted that I have to wait for the next one. All three books have been fast-paced and action-packed. Never a dull moment. The characters are so three dimensional and I'm attached to

them all. Really hoping that this series is a long one!

Henry Hayes says

A heavy hitter in the genre!!

I have absolutely loved the first 3 installments of this series. It is exciting, action-packed w/ very well thought out characters that all contribute to making them relatable & real. Keep up with the great stories & I will make sure my go-bag is fully stocked, my rifle is dialed in & my M9 is never too far out of reach!!!

Pam Shelton-Anderson says

This is a very good third book in a top-notch zombie series. I would have given five stars, but there are some writing errors (plurals instead of prepositions and some name change issues) and Gwen is just a terrible character. She has always had a lousy attitude and now has the excuse of some pregnancy hormones. Her foolish choices got a brave young man killed. I find myself skimming her parts of the story, mostly in the hope that she has finally been eliminated. I do hope this is not the end of the series as there are a couple of very big cliffhangers.

Michael Hamm says

No Spoilers! I've said this about "End Time" and "The Breaking" and now - again - for "The Rising". I've never been a major fan of the zombie apocalypse genre, but Daniel Greene nailed it! The books are enjoyable because of the character development - you can't wait to find out what happens next for Gwen, Steele, Kinnick and the rest. I wasn't sure what to expect out of this series - but it wasn't zombies and blood & guts. It was appreciation for each of the characters and their struggle & challenges trying to save the world from the threat of extinction. You get just enough military strategy & tactics - and the author does a great job of making you love the heroes and hate the villains in this series. What comes next????

Jennifer Hoskin says

I was so excited to get my hands on the third installment after waiting a year and I was shocked with how much I loved it from start to finish (in one non-blinking day)! The Rising is an excellent study in character development and surprised me several times with the suspenseful storyline. The characters are faced with incredibly difficult choices and Greene continues to illustrate the human struggle that we might not have been able to imagine if it weren't for his ability to anticipate and describe the reality of this otherwise surreal situation and make it believably horrifying. I was upset that it was over (my eyes were not) and I can't wait for Book Four!!

Tom Anderson says

Scary.

The possibility of a pandemic grows stronger and stronger with every international flight. Who can say what the next killer virus will be capable. I sincerely hope it will not be the one in this series.

Robin Miura says

Still a good read!

Really am enjoying this series wanting the good guys to live and the bad ones (and zombies) to die. This one again I am only giving four stars because of the annoying girlfriend. Makes me mad to have the girlfriend be stereotyped, mad at her boyfriend when he has no clue because she didn't tell him something...why game playing in the zombie apocalypse? What's wrong with having a real strong woman instead of game playing silliness? It is offensive to me as a woman. Some editing errors but very few.

Brady Bunnell says

Good goo-ga-ly moo-ga-lly!!! Been waiting on this one!! I was turned onto these books by a friend in a time when there was a dry spell of good stories that I haven't already read. This story of Steele and his crew has continually surprised me, each book raising the stakes, increasing in tempo and delivering a fun, thrilling ride. The characters and story have been following in this crescendo that is up at the start and only grows from there really forcing you to turn the page to find out what happens next. Greene, is really hitting his stride and you can really tell in his "voice" that he is just getting started which is awesome because that means more of this! Like the previous 2 books he tells the story in a Martin-esque format which each character tells their side of the story from their viewpoint. this, to me is the most interesting part of the writing style and my favorite to read. It offers you insight into each characters own thoughts as well as what they are thinking about other characters. Once again, Greene nails it with this third installment. He is really gaining a great reputation as new author and its cool to have seen him grow into one of my most anticipated authors to release a new book.

Andrea Payne says

Thank goodness

Had book 3 continued with a certain story line, I would have stopped reading. I LOVE this author and I love this series, but I just couldn't have enjoyed that. I'm sorry if I'm not helping you. I just don't want to give spoilers. Considering the ending of book 3, I'm going to give book 4 a chance when it comes out.

juliette dempsey says

Beware the righteous

Action,adventure and zombies. Loved this book and I enjoyed from start to finish.

Be afraid of the dead but be more afraid of the living.
I look forward to more.

Jim says

Daniel Greene kills it...again! The Rising is the 3rd installment of The End Time series and has become, by far, my favorite. With this novel, Greene creates a story that keeps you guessing and shows just how twisted his mind must be! Throughout this book, just when I would think I had where the story was going figured out, Greene would throw in a curve ball and completely change where the characters are headed. Because the author is great at ending each character's chapters on cliff-hangers, I found myself at the end of EVERY chapter looking ahead to see how soon I could get back to their story. Compound that across all the main characters and, like me, you won't be able to put this one down.

What I really liked about The Rising were the "villains". No real spoiler when I say there is of course one "Big Bad", but there are others throughout the story that I found myself thinking of as bad guys. What really struck me was how the author gives them motivations or reasons for their actions that kind of make sense. That is what made them even scarier in that they are not simply bad for bad sake. They really believe they are doing what is best for humanity while being completely ruthless. It's a fine line that Greene walks with precision. However, the true "Big Bad" of this book is one of the darkest villains I've ever read. This guy is seriously messed up and Greene must have one twisted mind to create him! But again, he thinks what he's doing is best for humanity which makes him even more compelling and sinister. There are couple of his chapters that will seriously make you cringe.

One of the great things about The End Time series is that the author takes a story we all know pretty well (Zombies) and adds something new and fresh to the lore. The Rising is no exemption. This is the first time I've ever had someone explain exactly what the zombie virus is and why it turns people into undead hordes of flesh eating monsters. Daniel Greene walks another tightrope in moving the action forward, while explaining the science behind zombies. The amount of research that must have gone into this science/medical aspect of the novel must have been enormous. The author explains and breaks down this complex idea into such simple terms that, by the end, it sounds as if the zombie virus could ACTUALLY happen. I would've never expected that I would enjoy "the science of zombies" as much as I did. Again, no spoilers, but the "science cliff-hanger" part of this book alone is enough to have you lining up to pre-order Book 4.

I feel like this series has gone from one main character to the big 3. In each story they each become more complex and interesting. Book 1 set up who these people were. Book 2 broke them down and they emerged from the figurative fire, remolded into who they would be. This book now has them taking their places as leaders in the new world. However, whereas book 2 is almost a phoenix story for these characters, book 3 feels like the "soul" book. We get repeated looks into the minds and hearts of these characters that flush them out far better than your typical action story. We see what the burden of command in a post-apocalyptic world does to someone and how, even though these people seem tough and decisive, they are real people with doubt and worry. They don't always do what you've come to expect from fictionalized heroes and sometimes you may not even agree with their methods. To me that makes for a far more interesting read.
