Nobody can expect a "Silhouette" to be the next best novel, but this one was actually okay and I knew in what I was getting in before.

There's no secret here: they meet, they're something coming between them, but they cannot resist the sexual attraction between them. This is the recipe and it was used for so many books that nothing feels like new anymore, but this one wasn't that bad; probably because I was set of reading some bad romance and I didn't want to poke my eyes out with Twilight or 50 Shades of gray.

Though I must say, Bobby's reason to disappear with the cash is hilarious. For someone who wrote 70 books (Sherryl Woods), she really was out of ideas for this one. I've got the feeling she improvised along the way. :))

Being investigated for a crime Gina had no idea had been committed, until she had been served a subpoena, decides to reschedule a deposition until she returns from an already planned reunion. The Attorney representing the clients bilked out of hundreds of thousands of dollars believes she has skipped town, although, she had rescheduled the appointment. He decides to follow her to Winding River, Wyoming. This is a frustrating (Personally, I'd had him arrested for stalking) but a very fun read. As with most Sherryl Woods novels, there is romance, love and lots of meddling of the five Calamity Janes, the long-time friends that cause lots of mischief during their younger years and well, keep on creating. I enjoyed this book, the third in the five book series. (There are only five although they boast six on some of the book descriptions (Lauren is the same as Wrangling the Redhead). I have read all five now and would recommend the entire series. Five stars.

I had read this one in 2004 and I liked it a lot. Sherryl Woods has graphically described the heroine's mind in the early part of the book. The way Gina and Rafe begin to love each other is awesome.

This one was ok. Gina and Rafe's story.

Awesome read,Gina-Rafe such cute couple,i really liked the way they started to understand eachother and explored their attraction which slowly developed into deeper and both fell in love

Gina's bonding with all her friends,Tony,her parents are so beautiful and Gina is such a good person always keeps thinking for others and her loyalty towards her friends is great

Rafe he has always seen bad sides of relationships,how they shatter and how commitment and love brings in deep hurt and pains which is why he refrains from going in any serious relations but with Gina he just can't stop himself and i really liked the way his respects keeps growing for Gina and in the start inspite of his distrust towards her he trusts her and helps her,his constant banter with his secretery is fun and when ever he threatens her he also knows its useless,i liked the way the boss-secretery relation was shown here

Its a cute heart warming love story

Great read
Recommend it

Another cute story in this series. The storyline of Bobby running off with the money because he wanted her attention was a bit silly but even though that was the reason that Gina went to WY and Rafe followed her there, it was actually a very minor detail in the story. All of the books in this series have had so many hints about what is going in Lauren's story that I can't wait to read that one and finally find out! I already read Emma's story so all of the other hints to the other's stories made sense but Lauren's.
