I absolutely enjoyed reading Poison Girl. The author's story is unique, which is refreshing. A secret society lives among the human population. They look normal, but are not. They age well, live long, possess unique abilities, and are supposed to keep their existence a secret.

Vera has her life all planned out. She is determined to avoid boys/relationships and wants to continue her education at Oxford. That is until she meets Roman, who appears to be "stalking" her. There is something about him that she can't quite figure out, but a mystery person shows Vera the truth by leaving her hints to piece together. Vera and Roman form a strong friendship, but things get complicated when Vera realizes that she has feelings for another. Poison Girl gives us a surprising love triangle, a forbidden love story in some eyes.

Vera makes a life altering decision in the name of love, but it has its repercussions. Nothing came out quite as she planned after all.
