Ascension Magick: Ritual, Myth & Healing for the New Aeon Christopher Penczak

Taking a magickal approach to this often misunderstood spirituality, Christopher Penczak explores the fascinating path of ascension. *Ascension Magick* unveils the diverse mystical roots of ascension, and highlights where the beliefs and practices of today's "light workers" intersect with those of modern pagans, witches, and magick practitioners. It also examines the practical side-various forms of magick, energy healing, meditation, past life regression, channeling, dowsing-and provides helpful meditations, spells, and exercises. From angels and aliens to reincarnation and the Merkaba, Penczak leaves no stone unturned in this remarkably thorough and absorbing examination of ascension spirituality and magick.

Hi there,

Just thought this book was worth a mention, as if I haven't got enough books bowing the shelves of my bookshelf already, I thought I'd push the boundaries of chipboard just a little bit further with this book. It's a big book, but that's not a bad thing, it's packed with all sorts of information which makes for an interesting read. Little did I know that I would need to test out one of the spells.

The spell I used was for Banishment of Unwanted Forces. I'd only had the book a few days and had already made a few notes on some ingredient I would need. If I go walking around ancient sites I often collect, with nature's permission of course, leaves, bark, berries or petals.

It was my dad's birthday, so we went for a walk through Rufford Park with our trusty Nikon cameras in hand. At one point we ended up in the ruins of the priory. After going inside we sat at a table with the life-size model of a monk. We took some pictures with him and listened to the sound of monks chanting which was very relaxing. On leaving the building to head down to the lake, I remember thinking how far back the park dates and that it must have a lot of spirits wandering around there. I then thought, I hope one doesn't follow me home, because being a Reiki healer I tend to attract spirits. We had a nice day then paid an exorbitant amount of money for an ice-cream at the tea room. I've not seen that kind of robbery since Dick Turpin threw a cape around himself and yelled, stand and deliver, only instead of stand and deliver they shouted, strawberry or vanilla. When she told me the price, I felt like shouting, get me a chair, I think I'm going to faint, and it wasn't from the heat of the day. Still complaining about the ice-cream we head home. My dad leaves and I go upstairs to work on a new story I'm writing. That's when I noticed a strange smell and electrical things started going haywire in my house. I said nothing, but when I went downstairs, my mum noticed the odour. She screwed up her face and said, what is that smell? I shake my head and think, here we go, I've brought someone home from my walk.

Now normally I would smudge and draw a few symbols, but I thought this time I would try out the book. So, I flick through the pages until I find Banishment of Unwanted Forces. On my walk, I noticed a hawthorn in the forest and collected a few of its white petals so they were already in my pocket. Luckily I already had everything else I would need. Pure water, 7 drops of Lavender, Orange rind, Sea Salt, and white flower petals. I can't tell you how nice this cleansing water smells after you have made it. I made a batch for a friend

and she is now smitten by it. So, following the instructions in chapter 14 page 324 I set off around my house. I started at the top and intoned the 7th Ray decrees, examples of which start in chapter 13 pages 286-290. I finished the cleansing and the smell and the spirit vanished.

Odd how I had bought the book only a few days before and then found that I needed it. Well, let me tell you it worked, so I was as happy as a squirrel finding it's hoard of nuts. So, I for one can highly recommend this book and I will be experimenting with it again. I'm going to explore the Magick of the Rays chapter 13 and make some Ray sprays which you can also use when you do your spell work.

There is information on Archangels, Ascended Masters, The Starry Ones, Candle Magick, Psychic Protection, Implant Removal, Ascension Cosmology, Spiritual Hierarchy, in fact all sorts of information. There are drawings of the Angelic Forces, namely Angels Signatures. Reiki symbols, Chakra Charts, Runic Star Alphabet, Egyptian Hieroglyphics, Enochian Signs, it just goes on and on, so this is a great reference book to have on your shelf.

I also wrote a review on Christopher Penczak Reiki Magick book which I also loved and used to sell in my gift shop. I highly recommend that book as well.

So, I just wanted to share my little story about the book and hope that if anyone out there is toying with the idea of purchasing it, then go ahead and get it, you won't be disappointed. Oh and try to make the Banishing Cleansing water it smells divine.

I am not a fan of Ascension theory, or it's history. However; I found this book to be extremely helpful in distinguishing the various movements within the new age movement

Great for anyone looking to even understand Being a light body worker, aka merkabah

There is just so much information in this book. So much! Christopher Penczak is ridiculously well educated and informed, and he does an excellent job presenting a wide range of information and ideas into what is essentially a text book. The exercises are presented in an easy-to-understand format, although you may want to record yourself giving the instructions or have someone else read the instructions to you in the more involved and elaborate rituals.

Although I am a total fan of Christopher Penczak, and I love the evolution of his work with Copper Cauldron Publishing, gems like Ascension Magick are worth the read and practice. This writing is bridge work between the pagan, magickal and occult community and the New Age or Ascension community. Groups that have more in common than they would sometimes like to admit.

Though I admit to knowing a lot of the information presented in the book it still became an education.

Collaborating ancient magickal practices, myth and the diverse energies into one place, it's a great "How to" book, though personally I would start with something more interesting and fundamental like The Inner Temple of Witchcraft and the Temple of Witchcraft Series by Christopher Penczak; this series has altered my life. :)

One of the reasons Christopher Penczak's books are thick, and one reason why I like his books, is because Penczak, unlike some authors or people who tell you you have to do things their way or otherwise you can take the high way, gives you many ways to do what he's talking about, and often the tools to create YOUR way.

This book on the phenomenon of Ascension is typical of this, you will find here many different systems of Ascension to work with if you choose to. For anyone who has any interest in this subject, I'd say this is the perfect book for you.

Far out! I recommend this book. It's chock full of goodies. Especially good for someone just starting out on studying Ascension teachings. Again use discernment...

Silas says

It was a hefty book that took me much longer to read than most Christopher Penczak books, because it wasn't as much things that I really considered before, and while much of it I considered and disregarded, I feel richer for having read it. There's a lot in here I just hadn't considered.

Lily Woodmansee says

Very, very interesting. Love the perspective of working with other cosmic forces. We are all a community after all. Wasn't able to read the book word for word, some of it is beyond my scope of interest for the moment.

Diana says

wow, this is a huge book filled with tons of information, I love reading about this stuff!
