Ashley Phillips says

I really enjoyed this book! I laughed, cried, had a permanent smile at parts completely fell in love with the characters.....but I also felt like the book was rushed! And I found that was sort of annoying because you sort of expect more and then that's it! But I have read all of Kelly mooney's books and did enjoy this one it just felt really rushed!

April Phillips says

This one is my favorite by Kelly. I wish there was more input in the last chapters. I feel like she rushed everything at the end. If you have read any books by Kelly Mooney then you should read this on at least!

Tabitha R says

Cute lil read. I liked the concept of the book. Although it seemed a little "fast" for my taste I did enjoy the book.

Catherine says

ummm, not exactly sure how I felt about this book. I liked it but not enough to become to invested in the character development. Found my self skimming the pages just so I could finish reading it.

Jessica says

Decent. I was really frustrated in the first 1/2 or so of this book, because I just really didn't understand Abby's reasoning for the way she dealt with Nick. But the book got better for me after that. I actually really enjoyed the last 1/2 of the book quite a bit. Overall, a decent, fairly quick read.
