Henry W. says

The book started the same way the last 20 books have - a rich and powerful man is thinking about how to finally defeat the Cahills. He always gives them little clues on how to finish his seemingly impossible task. It is becoming predictable. Especially if you are a fan of the 39 clues series 1 2 and 3, this may come across as uninteresting - everything has been done before. The main characters always make it out.

If you haven't read other 39 clues books, read series 1: the Clue Hunt, and series 2, Vespers vs. Cahills and nothing else!!

Tarissa says

What I liked? A fast-paced adventure filled with fatal intrigue. Plus, Dan starts showing off his inner geek that's been there all along (good for you, Dan!). The stakes (and the dirigibles) are high. Oh, and the scene where someone from the Cahill family falls from the sky.... whew!!! My, my, that is an incredible moment.

What I didn't like? One of the characters revealed that they are gay. This was a completely unexpected twist, and one that I wasn't thrilled by. Just saying. The topic came up maybe three or four times in the book in passing, but wasn't discussed in much depth.

Ross Rawnsley says

What can I say? Call it a guilty pleasure, but I am enjoying this series even though I am not in the authors target demographic.

It is a quick, fun, easy read (or listen)

4 stars

Another amazing book on the 39 Clues series. I loved the ending and I'm pretty sure that what I'm thinking is too obvious to be what is going to happen.

Thank you Edelweiss for providing an e-ARC of this book.

So it's the second book to the fourth series (or third spin-off of The 39 Clues) and the 37th book, BTW.

So the disaster that the Outcast will be replicating is Hindenburg, the zeppelin that ended the airship travel. So this is probably the (or one of the...) realistic book in the series so far and better than Mission Titanic.

It first started when the Outcast sent a poem to Amy and the others pertaining to painting about the death of Icarus (wherein the people are not looking at Icarus but to the sailing boat) which means (view spoiler) There's a lot of red herrings in here. Plus we have scenes of Nellie and Sammy trying to infiltrate (view spoiler).

The parts of the stories will include (view spoiler) and some revelations: a) something about Hamilton Holt; b) the Outcast plans; and c) the identity of the Outcast

Plus there is a Filipino character here named Erielle Cienfuegos (*probably named after his reader*), which have a huge part in this book. Can't wait to read the next book in the series, *Mission Hurricane*.

I would rate the action of this book as okay, but over the top. Jumping out of a blimp that has almost reached the Karman Line is unrealistic, but my son thought it was awesome. I was surprised when one of the characters "came out" as being gay and that was made a big deal. I don't like boy/girl relationships in children's books as I believe they are unnecessary, but I especially don't agree with adding boy/boy relationships to the plot, as it accomplishes nothing plot wise other than getting the author's views out. This is supposed to be an adventure story, not a relationship story anyway.

Dana says

I really have not liked this new series of the 39 clues and don't plan on reading any more of them. I especially disliked this book and will probably throw my copy in the trash. I don't understand why the author thought it acceptable to make Hamilton Holt gay. Totally inappropriate especially for children's book. Just because other authors think it is acceptable to write about doesn't make it right, especially when the target audience is so young and impressionable. Don't let you kids read this book. Totally inappropriate!

Well this was a nice change of pace.

Have to admit--not loving this series of 39 Clues books. Going to stick with them, but my ratings of each one

seem to be dropping with every book I read...

Stephanie - Adventures Thru Wonderland says

Cover: Shocking!

Rating 3 Stars

Overall: Not the Best

Characters: Cliche and Stereotyped

Plot: It was OK

Page Turner: Eh, yeah

Series Cont.? Yes

Recommend Maybe?

Short Review

This one was a let down after the first. There was a lot of Cliche and Stereotyped behaviors from all the main characters. They seemed to all be...off? I gave it three stars because it does the job of getting the reader from book 1 to book 3, but it's in no way the best book in the series. I didn't hate it, but I don't plan to reread it either.

I am ashamed of all the bigots who don't like this book because it mentioned that one character is gay. You're ok with all the violence and murder but you mind that a boy dates a boy? 3 sentences in a book should not cause so much offense. I'm offended you're offended.

"Mission Hindenburg" by C. Alexander London is a great novel with so many twists and turns that you'll never know what happens next. This book is the second in the series, the sequel to the first one, "Mission Titanic." After the "Outcast's" failed Titanic plot, he tries to recreate another disaster, the fiery Hindenburg crash. In the beginning of the book, Ian and his friends get a message from a blimp. The blimp starts flying toward its landing spot, and the kids follow it. Once the blimp lands, it blows up, but the kids got there at just the right moment, and prevent any injuries to innocent people. However, they believed that the explosion wasn't the disaster the "Outcast" was trying to recreate, they believed that he was just showing them what he was capable of. After some research, they find that a zeppelin race will be held in Athens, Greece, and the racers will be racing to the Karman Line, which is the edge of space. During the race, all the zeppelins had to land because of a mishap caused by one of the kids. After this, only two zeppelins remained, and one was a zeppelin the kids knew wouldn't be attacked, so they stowed away on the other one. Once aboard, they meet a girl who tries to tase them with a taser. But the kids fought back, and they eventually captured the girl. However, I can't spoil the book, so if you want to know what happens your just going to have to read it. Besides all of the action and adventure, I feel that this book was very well written by C. Alexander London. He did a great job of describing the setting of the book throughout the novel. I really feel like I could have

been there while I was reading the story. Another thing that London did well was portray the characters as they actually would've been real life. In "Mission Titanic," I feel like the characters never had too much urgency. For example, first the kids travel to Canada, then to Boston, then to Argentina, and then they finally reached where the actual disaster was happening, and yet they were still a little too calm. However, I didn't really notice this until I read Hindenburg, then I noticed there was a huge difference in the characters. In Hindenburg, the kids started off in L.A., and then flew directly to Athens. One kid even went to jail because he was trying to stop the disaster. I feel like the same kid in the last novel wouldn't have done that. I really liked this book. It was so interesting and there was the perfect mix between fictional and nonfictional elements. I predict that in the next book, the "Outcast" will try to create another disaster, but the kids will foil his evil plot and save the day. I feel that C. Alexander London did a very good job, and I also feel that this book deserves all 5 stars. :)

Great MG. Not doing a review for it as usual though. If you want to ask something just comment :)

This was, by far, one of the best books in the series! So much stuff got laid down, like the fact that Grace was not at all who she seemed, Cara is an amazing character, and Dan cannot stop being awesome! I can't find anything wrong with this book!

And the fact that I was right about who the Outcast is, also helps.

And I came up with that theory after a no-good-fanfiction boredom session and being delusional because of not getting enough sleep! How amazing is that!

But seriously, pick up this book, because C. Alexander London did an incredible job on this one!
