Luke Waldron says

the wait for this comic was long and seemed shorter than the others but oh my god was this a great ending to a comic story it answered my question how they got the data but also gave me tons more as to why the geth built the telescope in the first place and how they built it which i wont spoil because its worth seeing for yourself it just plays on your wonder as a mass effect fan and i have grown a theory that the geth might either be looking for the reapers or they want to leave the milky way to start a new life as the rest of the milky way galaxy are scared of AI but thats just a theory and i really enjoyed this comic it's gave me abit more faith in the series future top stars from me ?
