Dying to Go Viral

Sylvia McNicoll

Dying to Go Viral Sylvia McNicoll

What would you do if you only had one week to live? A skateboarding accident claims 14-year-old Jade's life when she skitches (hitches herself to a car) in order to appear on youtube; she neglected to wear the helmet she promised her father she would always use. In a Japanese garden she meets her mother who died when Jade was eight. She begs for the chance to return to earth if only to improve relations between her brother and father and Mom negotiates a one week do-over for her.

What can she achieve? A date for her father? A new job for her brother? Her first kiss? Jade can't tell anyone what is going on, which is bad enough, but after discovering a love for life that she's never known, will she be able to let go? Or will she try to cheat fate?

Melody says

This is an easy read about an important subject - what can happen when you take a risk to impress someone you like. Very good for reluctant readers.

Luke Schuurman says

This story was truly heartbreaking. Getting to relive the last week of your life would be amazing. Yet she relived her life and she got her dad in a relationship, kept her brother from being "shipped" off to college and had her first kiss. I loved this book and I would recommend this book to anybody.

Amanda Thomas says

A beautiful story about what it means to put the needs of others before yourself, and how to look at the world around you without taking anything for granted. This story explores what it means to hold on and to let go of the people we love, and provides a glimpse at how we might live our lives if we knew just how limited our time was.

I won this book in a Goodreads giveaway.

Rachel Seigel says

Very sweet book about making the most out of life because you never know when you'll run out of time to do the things you want to. Should have strong appeal to middle-schoolers. Will be a great discussion book.

Jocelyn says

Great concept, perfect tone - this poignant book should go viral!

Ashley says

Interesting concept that made me question what I would do in the same situation. It gave me something to ponder. The book reinforced how I need to value every person I love and to embrace every random life event; Live life to it's fullest.

The Burlington setting was an unexpected surprise and drew me further into the tale than had it been set elsewhere.

I wished for a different ending, but am happy that the author held true.

Nicole Luiken says

Sunburst YA Award read, so no rating or review.

Deborah Serravalle says

Thought-provoking, disturbing and delightful, Dying to Go Viral is McNicoll at her most creative.

Joyce says

you know, I could swear I wrote a review of this a long time ago, but it's not here. anyway, I'm pretty sure I said that the initial scene of her skateboarding while holding a car bumper was a great hook, and that I also liked that she focuses her energy during her 'second chance' on healing relationships. Found the whole premise of the story a bit hokey though.

ah, just found the review--somehow it ended up under the comments on this book. Oh well. read the comments.

Sarah Clarke says

After reading "Crush. Candy. Corpse." as suggested by my teacher, she gave me this book by the same author; the lovely Sylvia McNicoll. I absolutely loved every minute of it, never felt as though I was forcing myself to push through the pages, as I have with other recent reads. This being my second Sylvia McNicoll book this year, I've decided to go ahead and try some more of her books.
