K De says

James Stokoe's artwork is a descendant of the great French artist Moebius. Great delineation and detail that makes it a pleasure to look at. The story continues of a crew that must survive in the great survivalist horror of the Ridley Scott "Alien" film. Well done as I await the next issue in this series by a wonderful artist.

Chest explosion time. Not looking good for the ramshackle station either.

Gabriel Wallis says

Not too impressed with this comic book, since it seems like a replica of the old *Alien* movie. Art's good, story's okay.

A bit better than #1, still not too sure that this one is for me.

Learn a bit (just a tad) more about the crew and some glimpses of what happened. But still it's a bit unengaging.

To be honest it could be the art that puts me off, as I mentioned in the #1 review, it really isn't my cup of tea.

Logan says

Story wise it's not too bad. Artwork is a bit of a mixed bag for me, most of the time I don't like it but then other the times the page spreads are so gruesome and cool looking!
