Hated it

ALL the stories were about either children or women being sexually abused. Very dark , and nothing like the other books in the series. I usually read these stories then look for other books by the authors, NOT this time. I'm not interested in ANY of these authors.

The stories in the book were enjoyable and I wasn't happy that I had read the book so quickly because I couldn't put it down. :)

the first story was awesome..

Belinda says

I enjoyed each of the stories by Amaleka McCall, Chunichi, Mesha Camm & Nichelle Genovse.

Blkstorm says

This was a decent read. In the first story Kelsi bites the hand that feeds her. Although it was good, I really wondered how she got caught. The second story the main character was just looney. The last story had the most potential but it cut off suddenly without answering questions. It was like reading a book halfway and then never going back.
