Sooo, I was REALLY apprehensive when I started this story. I knew going into it that there were some emotional points. Unfortunately I thought that it was behind them and then it all came to a screeching stop at about 85% or so. Oh my goodness, my heart dropped to my stomach. Now I must say it took everything in me not to breakdown and cry for Grayson & Evie. What they endured was beyond words, and so horrific that I didn't know if I could continue. But I had to finish and even though it did end well for the both of them, it still hangs over my head. This story will definitely leave a mark on my memory. I would've given this story five stars, but like a lot of other reviewers said it had numerous editing mistakes. Otherwise, Evie & Grayson's love story was beyond time and space, and the way they were able to heal each other was a true testament of their love.

I had read a book by this author previously I loved so I was really excited to read this. Unfortunately it was a dud. A big one!

There are so many flaws in the book and character development issues. I want to know how Evie got to this point. This book spent more time 'telling' me what happened rather than showing me and making me feel for this character. And Evie deals with a lot but because it always felt rushed I was never pulled in to the story. Or had my heart crushed along with hers. (Pst, yes I want me heart breaking and bleeding for characters.)

Even Grayson, I wanted to smack him upside the head more often than not. His logic and whiney attitude rubbed me wrong. I wanted more from him, whether it be restraint at the beginning or confusion...I dunno something!

Even with him disappearing; he returns and no ones really bats an eye. He gets a free pass?? People are not like that; at least not those in ones inner circle.

This book was not for me and I feel it was so far from the first book I had read from her. Was a disappointment.

I should've read more reviews on this book...or at least the front part of the book warning of rape. I can normally read angst or dark subject matter but this book just pissed me off. I understand the need for some tragedy but seriously...these characters were put through the ringer time and time again. Spoiler alert: The heroine wasn't just raped, she was gang raped while her badass war hero was forced to watch. At least the author could have made him get free, save his girl, and kick those guys' asses. Seriously I wished I had a better warning. I'm sure most people who pick up this book aren't looking for such dark subject matter so here's the warning I wish I had.

When she acknowledges she stole my work and the work of several other fanfic writers, I'll go away and leave her alone. Until then, I have to assume that nothing is changed and she can't be trusted. Shey Stahl stole from me.

I thought this story was ok. There were definitely some intense scenes, but overall, I don't feel like the main characters were flushed out very well. We didn't really learn all that much about them. Also, both of the main characters had some psychological problems which were addressed, but i felt like they were not mentioned a lot or very well. Grayson had PTSD throughout the whole book, but it wasn't alluded to very much throughout the story. I feel like it didn't influence his character as much as it should have. I mean, I guess part of the reason might be because of the whole "distract me from my problems" thing. The end of the book definitely did a better job then the rest of the book. But, it still wasn't exactly what I expected or wanted. (This might partly be due to the fact that I am a Psych major.) We learn next to nothing about any of the side characters. They basically just exist without much point. The writing style of the book also seemed... too simple? I don't know how else to explain it.

Overall, I did really enjoy the story itself. It was a pretty good story, but I couldn't help notice the bad writing and the bad characters which took away from my enjoyment.

I don't know why everyone's here said its plagiarism but I love the story because it's beautiful

I just finished....could not put it down. Grayson swoon worthy...Evie, just want to hug her. Want to hug them both. Loved the supporting characters

I won't be buying or reading this because I can't be certain what's contained within isn't borrowed from somewhere or someone else.

Not my favorite

This book was not my favorite. I did not connect with the characters. The beginning was frustrating cause I felt like they talked about the same thing over and over again.

Tia says

This novel was brutal, completely soul sucking brutality but in it's own simplistic way, it was beautiful. Fucked up but beautiful.

Goodymob says

I'm sorry to say this novel was a huge disappointment. It wasn't terrible but I certainly expected more from this author. The storyline seemed promising but I just wasn't able to connect and it fell into the did not finish category.

4.5 Grayson loving Stars!!!

Wow! This book surpassed all of my thoughts!! I love all the books Shey has written and her Racing on the Edge series with the Riley clan is still one of my favorite series I have ever read!! Needless to say, I had some expectations for this book!

Grayson Gomez is Aiden's (from ROTE series) cousin! This had nothing to do with the ROTE series and actually had a great great storyline!! Evie was a great strong willed amazing heroine!! :) She stuck to her guns and the friendships in this book were great too!! Don't worry gals, Jameson makes a small cameo, and of course, he is still swoon worthy!! :) :)

This book dealt with military background as well as some intense scenes!! I had so many conflicting feelings and I had to have a box of tissues in the last 20% of the book! I was a little sad at how quickly it wrapped up, but still think it wrapped up everything well!

Great job Shey!! I am so happy you are continuing to write, and write your stories like you always have! :)

*** I don't want to ruin anything, but I feel like people need to know that there is rape in this book. So if you are not good with that subject this book might not be for you. It also deals with the time of 9/11 and the military troops being shipped out over seas.
