helped me actually turn my health around

This was an excellent book. I never understood removing the naturally occurring fats in items like meats and dairy, and his reasoning as to why we should actually consume these fats with the meats and dair, made total sense to me. The fats are a natural, normal part of meats and dairy products, and while you really don't want to consume the fat on its own, it makes sense that they ARE a part of the food, and therefore may add some value to the food if eaten with it, not removed. He states that these fats actually aid in the digestion of these foods. I have not been able to eat beef for years. I started buying the highest level of fat I could find, and I am now able to eat it with no issues. I don't consume it daily, but I can enjoy a burger or some steak, now and not get indigestion anymore. I'm not big on dairy consumption, but once I started eating full fat yogurts, sour cream (YUM), and avoiding low fat and non fat, I did much better digestion-wise and started losing weight. I wasn't eating less, but I was eating better, and the weight dropped! This was the biggest point I picked up from his book. I was disappointed with all his recommended fancy diet aids, many of which he sells and can't be easily found elsewhere. This is a common complaint about the book. But a lot of his information was similar to Biblical, Whole Foods, and other healthy diets. He even discusses many diets in his book and why they appeal to people, why they seem to work, and what's wrong with them. I plan to eventually purchase this book as a part of my library, and have often checked it out of the library to read or reference. It would be easier to reference it at home!

Excellent source of information, faith based, true story, of healing from chronic IBS and Crohn's disease. What a story he tells, of rejuvenation, renewal and restoration of the body, mind and soul.

### Amy says

Full of information that explains more of my battle with Crohn's. It is the way I have been eating and will continue to do so.

### Phyllis says
