The hits just keep coming

So, just when I was thinking that no one could possibly keep up the momentum on a series, Sarah Noffke proved me wrong, again! If you love humor, adventure, aliens, space ships, intrigue, twists, turns and surprises, all wrapped in one book with it tied up in a bow: this could just be for you. Unless you're afraid of having TOO much fun!

Linda Inman says

Full of action

The story is on going, so it is better to read them in order. The action is non-stop. They keep adding characters to fill out the story like shape shifting snakes lots of fun!

George Lawson says

Love the Ghost Squadron

Enjoyed all the books in this series. Great characters and a strong story make reading a pleasure. I don't always wait patiently for the next installment.

Beverly Laude says

Another great addition to a wonderfully written and fun series! If you love the campiness of the original Star Trek and/or Doctor Who, you should give these books a try. The characters are totally irreverent and curse a lot, so if that is a problem, stay away! But, if you love snark and sci-fi, this one's for you!

Teach and Juliana and the rest of Ghost Squadron are tasked with finding a group of thieves intent on stealing a device that could tear the galaxy apart. They soon discover that the thieves are probably from the Saverus race, a group of shapeshifting snakes that was thought to be extinct. How can you know who to trust when the Saverus can take on anybody's identity?

This book has some twists involving characters that were introduced in earlier books. I like the fact that the authors continue to add more dimensions to some of the lesser characters. And, there are some new, quirky characters that make an appearance in this book as well.

I especially enjoyed Pip, Juliana's AI, in this book, as he tries to become more human, even suggesting that he take over Juliana's body! The dialogue between Pip and Juliana were great fun, especially as he tries to

convince her to go Vegan. Lots of LOL moments between these two!

The book has plenty of action, some cringe worthy aliens (snake-people and rat-people.....EWWWWWWW!), and hints of romance. All of this along with the usual snarkiness and witty dialogue that readers of the series have come to love and expect.

In the author's notes, Sarah Noffke hints at 49 more books in order to satisfy the fans.....YEAH! I never get tired of listening to these books and hope that there are many more to come. Always good for great entertainment! The narrator, Chris Abernathy, does his usual wonderful job and adds greatly to the enjoyment this series brings to my life.

Full of adventure, mysteries and humanity. I love the fact that along with all the adventure we get to learn about humanity from the AIs.

Total Score: 5/5

Summary:

Eddie and Julianna have a new problem to deal, shape shifting snakes who can take on any ones appearance. Imagine not knowing if you are looking at friend or foe. Add to that Eddie's irreverent behavior while takes the safety of every member of his crew. Now Julianna on the surface appears to be emotionless and hardhearted, but as the series continues the reader begins to see her change and grow as a person. It makes me as a reader wonder how much of those changes stem back to her evolving relationship with Eddie. He may appear carefree, but his commitment to the safety of his crew and completely their missions is crucial to him. It makes me as a reader wonder if their could be more between them as time goes by. We will have to wait and see. One of their Crew Noah is about to have his life altered as someone in his past returns changing everything for him and others on the team.

The Audio book version brought the characters alive as the narrator added a unique flair to each individual.

What next???

Lots of action, interesting insights into different characters, and a fascinating tease for the next book. I'm running out of books, though, so hope more will be released quickly in the Age of Expansion arc!

Ok, going to out my age here with a very nostalgic blast from the past...

The snakes remind me of Nag; the evil Cobra and her mate from "Rikki Tikki Tavi" . Not exposing because of you have ever seen it or read the tale, you would have not forgotten.

" You move...I strike...you don't move, I strike" evil momma cobra. Evil snake aliens. 'Nuff said. Love the story and thanks for the trip down memory lane.

Alastar says

Different

Well this story was definitely a bit of a mind warp, can't say as I am fond of the Saverus. I am happy that Julianna got more page time, and actually got to accomplish some things.
