Now available in two-volume splits as well as the combined version.

Through Women's Eyes: An American History was the first textbook in U.S. women's history to present an inclusive narrative within the context of the central developments of U.S. history and to integrate written and visual primary sources into each chapter. The result, according to authors Ellen Carol DuBois and Lynn Dumenil, was to "reveal the relationship between secondary and original sources, to show history as a dynamic process of investigation and interpretation rather than a set body of facts and figures." The enormous success of the first edition confirms that the field of U.S. women's history was ready for a groundbreaking textbook that focuses on women from a broad range of ethnicities, classes, religions, and regions and that helps students understand how women and women's history are an integral part of U.S. history.

I read this for a class, Women in US History, and loved it! It gives great perspective of the history of the US from before Europeans arrived to 2015, discussing life and experiences women went through, including African Americans, Native Americans, and other minorities. Reading this book gave me a better and more well-rounded understanding of our past, and as a future History teacher, I find that invaluable. This will be a fantastic tool and reference for me, especially with all of the primary sources included in each chapter. Highly recommend!
