Clint Flatt says

The more books I have read by Joseph Marshall III the more I have come to enjoy his deep emotional spirit for his people's past. This emotion is not about all the wrongs that were done to the Lakota but is a fear that they will become a forgotten people if their history is not kept alive not just in history books and record books but more importantly the stories of the past are kept alive. The good stories of a powerful caring group of people and a strong and determined group who only wanted freedom to live their life their way.

carlos benjamin says

Outstanding story telling in the oral tradition of the Lakota people. By the end of this book I felt as if I knew Crazy Horse as Cloud did. It is said that the victors get to write history. In this case we get to hear the other side. The perspective is illuminating. If you're at all interested in this segment of American history, this book and "Hundred In The Hand" are well worth your time.

I highly suggest these books be enjoyed in audio format, read by the author. I do not think reading them yourself will have the same impact..... Not even remotely. This would not be my recommendation for most books, but I can't emphasize enough how greatly enhanced the audio version is over print for these two books. I can't think of any other book for which I could make the same claim.

Sam says

This is the second book in Joseph Marshall's Lakota Westerns series and I absolutely loved it. I tore through this 400+ pager in less than a week.

If you've read any of Marshall's previous books you know that he is an amazing storyteller and oral historian in his own right, so I love that he has imbedded a similar character into his series. The genre of historical fiction has proven to be an amazing medium for Marshall to work within. He is able to tell the stories of these well-known clashes in a way that betters our understandings without vilifying anyone else's. It's humble. It's provocative. It's just so damn good.

RS Fuster says

It's hard to read about the greed of some men and their willingness to break their word. Some part of me is Assamese of our history of these United States. When will we learn from our behavior and change how we treat each other and others who are not from here USA. How can Americans tell others to forget our past transgressions if we continue to act in the same manner year after year.
